Les Fermentations Au Service Des Produits De Terroir:

Les fermentations au service des produits de terroir Marie-Christine Montel, Claude Béranger, Joseph Bonnemaire, 2005-11-13 Grâce aux fermentations certains microbes contribuent largement la richesse sensorielle des produits de nos terroirs. Loin de nous nuire, ces microbes sont des amis et des gardiens de notre alimentation de sa diversité de ses goûts et de ses cultures. Cet ouvrage présente un panorama historique géographique et socio-économique des produits fermentés. À partir des résultats de la biologie, il montre comment les fermentations interviennent dans la laboration des saveurs de produits tels que le vin et les fromages tout en garantissant leur sécurité sanitaire. Cette synthèse originale tablie dans le cadre d'un partenariat entre l'Inra et l'Inao intéressera tous ceux qui se sentent concernés par les interactions entre les avancées scientifiques et le respect des produits et cultures traditionnelles.

Les fermentations au service des produits de terroir MARIE-CHRISTINE. MONTEL, Claude Béranger, Joseph Bonnemaire, 2025-09-22 Depuis l'aube des temps les hommes utilisent les fermentations pour conserver des aliments très variés. Ces savoir-faire ont engendré des goûts et des pratiques culinaires qui font partie de l'identité des diverses civilisations. Aujourd'hui dans les pays riches les modes et techniques de conservation, l'industrialisation du secteur agroalimentaire et les contraintes sanitaires associées risquent de faire disparaître des saveurs spécifiques des produits de notre gastronomie dont l'identité repose en grande partie sur les fermentations qui ont permis de les laborer. Cet ouvrage met en évidence que loin de nous nuire, des microbes sont des amis et des gardiens de notre alimentation de sa diversité de ses goûts et de ses cultures. Un panorama historique géographique ethnologique et socio-économique permet de situer ces questions dans la dynamique des civilisations et du maintien de leurs identités, des pratiques, des savoirs et des terroirs. Les disciplines biologiques apportent dans un second temps leurs réflexions et résultats sur les fermentations qui permettent la laboration des produits de terroir et qui contribuent leurs saveurs tout en garantissant leur sécurité sanitaire. Se conjuguent ainsi des apports originaux de disciplines scientifiques variées et des expériences d'acteurs de terrain qui peuvent dialoguer autour d'un même objet complexe et d'une problématique partagée dans le cadre d'un partenariat entre l'Inra et l'Inao. Cette synthèse originale des principales connaissances disponibles dans ce domaine intéressera tous ceux qui se sentent concernés par les interactions entre les avancées scientifiques et le respect des produits et des cultures traditionnelles.
