Les Grandes Inventions:

, **French Inventions of the Eighteenth Century** Shelby T. McCloy, 2014-07-15 The eighteenth century age of France's leadership in Western civilization was also the most flourishing period of French inventive genius Generally obscured by England's great industrial development are the contributions France made in the invention of the balloon paper making machines the steamboat the semaphore telegraph gas illumination the silk loom the threshing machine the fountain pen and even the common graphite pencil Shelby T. McCloy believes that these and many other inventions which have greatly influenced technological progress made prerevolutionary France the rival if not the leader of England In his book McCloy analyzes the factors that led to France's inventive activity in the eighteenth century He also advances reasons for France's failure to profit from her inventive prowess at a time when England's inventions were being put to immediate and practical use
