Les Déplacements De Population Dus Au Changement Climatique:

Les déplacements de population dus au changement climatique Amélie Mayoussier, 2013-03-01 Le changement climatique exacerbe les phénomènes extrêmes avec des conséquences directes sur les conditions de vie, la santé et le bien-être des individus. Face à la multitude des scénarii de violations des droits de l'homme, il devient urgent de trouver des solutions juridiques aux problèmes des déplacements de population engendrés par ces perturbations.

Chapitre 9 - Changements climatiques et démographie Sabine HENRY, 2022-01-01 Les principaux impacts des modifications environnementales sur les facteurs démographiques sont analysés sur la base des rapports du GIEC, la source principale des connaissances scientifiques concernant le changement climatique. La complexité des mécanismes étudiés est mise en évidence. Sont ensuite abordés les impacts du changement climatique sur les variables démographiques. Le cas des populations dites piégées est approfondi. Mots-clés : Changement climatique, GIEC, Migrations climatiques, Morbidité, Populations piégées. DOI 10.51926/ISTE.9051.ch9

Changements climatiques et impacts Martin Beniston, 2009-01-01 Cet ouvrage propose une étude approfondie des processus physiques fondamentaux à l'origine de ce que l'on appelle désormais le réchauffement climatique. Il offre un aperçu précis du climat et de ses impacts en Europe au cours des 20^e et 21^e siècles et expose l'ensemble des bases physiques nécessaires pour comprendre pourquoi et comment le climat change et dans quelle mesure le réchauffement rapide des prochaines décennies modifiera non seulement notre environnement naturel mais aussi la plupart des activités économiques continentales. Les premiers chapitres accessibles à un large public exposent les principes scientifiques généraux à l'origine de ce phénomène. La suite de l'ouvrage examine plus spécifiquement le cas des Alpes, qui se caractérisent par une topographie complexe où les processus climatiques sont généralement amplifiés. L'abondance des données environnementales et socio-économiques font du domaine alpin un lieu d'étude privilégié pour analyser les changements et impacts climatiques récents et pour valider les modèles de simulation capables de donner un aperçu de notre futur climatique. Cet ouvrage de référence rédigé par un expert mondial du domaine s'adresse principalement aux professeurs, chercheurs, étudiants et praticiens impliqués dans les solutions technologiques, économiques et politiques de la question climatique, mais aussi à un plus large public intéressé par cette problématique.

Démographie, climat, migrations : l'état d'urgence Jean-loup Bertaux, 2017-09-14 Savez-vous que chaque jour la population mondiale augmente de 225 000 habitants. L'équivalent de la ville de Lille et en un an de 82 millions, soit un peu plus que la population de l'Allemagne. À ce train-là, l'humanité va droit dans le mur. Tous les experts le savent. Mais ils n'osent pas dénoncer explicitement le facteur principal d'explosion de la population mondiale : le dynamisme démographique ou plutôt l'inconscience des gouvernements et des peuples en Inde et dans l'Afrique au Sud du Sahara. Cet ouvrage explique comment on en est arrivé là. Il démontre le mécanisme du changement climatique en marche : d'une production massive de CO₂ et de son effet de serre. Faisant fi du politiquement correct, l'auteur lance un cri d'alarme. Il y a beaucoup trop de monde sur la planète. Il faut s'attaquer en priorité à l'augmentation de la population mondiale. Il conviendrait même de la réduire, puisque les

calculs d'empreinte écologique montrent que la Terre ne peut supporter que 2 milliards de personnes consommant et polluant comme un français moyen. Si rien n'est fait, les projections démographiques indiquent qu'il y aura 4 milliards d'habitants en Afrique en 2100 soit 3 milliards supplémentaires dans des pays devenus invivables à cause du réchauffement climatique. Combien d'entre eux tenteront alors de migrer vers l'Europe ? Un essai qui appelle sans complexe à stigmatiser les politiques natalistes afin de réduire le taux de natalité. En d'autres termes : Make the population small again car nos enfants ne seront plus heureux que s'ils sont moins nombreux. *Réfugiés climatiques* Collectif Argos, 2007. Selon l'ONU, environ 150 millions de réfugiés du climat devraient être déplacés d'ici 2050. Pendant quatre ans, le collectif Argos est allé à la rencontre des premiers réfugiés climatiques : ces hommes et femmes déjà poussés à l'exil à cause du réchauffement du climat. De l'Alaska où se pose le problème du gel des sols arctiques aux Tuvalu, Maldives et Haïti pour illustrer la montée du niveau des océans en passant par le Tchad et la Chine gagnés par la désertification, le Bangladesh qui subit l'inondation des deltas, le Népal victime de la fonte des glaciers, enfin les États-Unis où les cyclones sont de plus en plus violents. Soit au terme de ce périple neuf étapes afin de veiller les consciences sur l'ampleur prévisible des mouvements de population et la perte d'une pluralité ethnique et culturelle.
