Examines the impact of quantum computing on manufacturing and logistics with a focus on sectors such as automotive and aerospace. Real world scenarios illustrate how quantum solutions can streamline operations and drive efficiency. Explores quantum algorithms and their use in addressing challenges like route optimisation inventory management and demand forecasting offering strategies to reduce costs and improve resilience. Considers the current limitations ethical implications and the path to widespread adoption of quantum computing in supply chains emphasising the need for interdisciplinary collaboration.

**Regional Economic Integration in East and Southeast Asia** Jarita Duasa, Nursilah Ahmad, 2020 **CEPAL Review**, 2015 Cahiers BEI, 2001 **New Challenges Facing Asian Agriculture Under Globalisation** Asian Society of Agricultural Economists. Conference, 2005 *15 Years of the Information Technology Agreement* World Trade Organization, 2012 The Information and Technology Agreement (ITA) was finalised at the first WTO Ministerial Conference in Singapore in 1996 committing its participants to completely eliminate duties on certain information technology products. In its 15 years the ITA has promoted affordable access to a wide range of technologies encouraging closer cooperation between developed and developing countries. As production networks become increasingly global the ITA will continue to facilitate the shift from products made in a specific country to Made in the World. To mark the 15th anniversary of the ITA this publication charts the political and technical obstacles which were overcome during the creation of the Agreement and the issues which still need to be resolved. It charts the establishment of the ITA Committee and how the Agreement is implemented and investigates the impact the ITA has had on trade liberalisation and innovation. The publication also examines the effect information technology has had on global production networks and what this means for developing countries and the ITA.
