Mother Daughter Therapy Exercises:

The Solution Is in Your Hands Heather Dorothy Pollock, 2017-03-06 As a parent or teacher of children with learning or behavioral difficulties you're likely to feel worried or anxious. You might also be frustrated and stressed having tried a range of things to help resolve the problems without success. In *The Solution is in Your Hands* author Heather Dorothy Pollock offers a guide to help parents and teachers recognize children are unique individuals who need a safe holistic approach rather than expecting one label or one strategy to fix all. It encourages the understanding that more of the same more teaching writing homework or tutoring isn't the answer and won't effectively change anything. *The Solution is in Your Hands* provides a greater understanding of what's happening for the children enabling early intervention the implementation of strategies and the celebration of success. It teaches how change will manifest without the need for drugs counseling punishment condemnation or medical intervention and eliminate the need for travel appointments and pressure on the family budget. Based on her seventeen years of experiences Pollock shows that with an investment of as little as one hour per month for therapy and fifteen minutes a day for exercises parents and teachers can effectively achieve sustainable results.

Home Health Care Nursing Ida Marie Martinson, Ann Widmer, Carmen J. Portillo, 2002 This New Edition of *Home Health Care Nursing* is a comprehensive and authoritative text for nurses working in the dynamic field of home health.

Administrative and clinical content is included providing all the essential detailed material that today's home health care nurse needs. It places home health nursing in the context of the health care system discussing such administrative issues as the continuum of care, discharge planning, managed care, and reimbursement. It also presents the basic competencies of home health assessment, nursing diagnosis, symptom control, nutritional support, and rehabilitation. Caring for clients throughout the lifespan and in a family context is emphasized as well as the specialized care of clients with specific disorders most commonly seen in the home such as pulmonary disease, cancer, AIDS, stroke, Alzheimer's disease, heart failure, and renal and genitourinary disorders. Finally, it identifies and discusses the professional challenges of ethics, stress, and research in home health nursing. Case studies are included throughout the book to help illustrate the concepts being discussed. Paediatric content added to each chapter of the Specific Disorders section as appropriate helps guide the care of this population of home care clients. New chapters on Case Management and Home Health Care (chapter 2) and Managed Care (chapter 5). New chapters on Cultural Competency in Home Care (chapter 14) and Psychiatric Home Care Nursing (chapter 26). Costantino, 1985 A seven year project developing and testing cuento therapy, a form of child psychotherapy in which Puerto Rican mothers recount to their children folktales taken from Puerto Rican culture is described and evaluated in this monograph. Chapter 1 explains how the research presented in later chapters fits into substantially broader patterns of research focusing on the treatment of the psychological problems of Hispanic populations living in the United States. Chapter 2 presents an interdisciplinary discussion of traditional folk healing practices in Puerto Rico, the function of folktales throughout history, the use of storytelling in psychotherapy, the theoretical framework of cuento therapy, and the mother's role in the therapy. Chapter 3 presents the methodological procedures used in conducting cuento therapy and in evaluating treatment outcomes. Chapter 4 provides results of an analysis of treatment effects on trait anxiety, cognition, role playing, observations, and personality profiles. Finally, Chapter 5 presents a general overview of the clinical utility of cuento therapy. The major finding was that cuento therapy was effective in reducing trait anxiety. It also improved cognitive skills relating to social judgment and had some effect on aggressive behavior as observed in role playing situations. Its effect upon children's personality development was unclear, but its sensitivity to the clients' not the therapists' cultural background should be useful to community mental health centers serving Puerto Rican clients.
