Real Estate Finance and Economics Lucy Ogbenjuwa, 2023-01-23 Finance is essential to the real estate project development sector's success. However, there is still an enormous gap in the real estate sector. What seems to be required is a model that could guide managers in securing real estate project development finance. Findings have shown that no comprehensive framework is presently available. This book presents a toolkit to support real estate managers in securing real estate project development finance. The book will help managers to understand the different financing options and criteria required by financiers. The study includes case studies from developed and emerging economies including Germany, the United Kingdom, the United States of America, China, Nigeria, and South Africa. The author concludes that the dominant challenges common to managers in both economies are access to land collateral and rising interest rates. Cyber-physical systems, actuators, sensors, IoT, robots, and cobots for repetitive and dangerous tasks, and drones for mapping, progress monitoring, safety, and quality inspections, lifting, moving, and positioning, and Technologies: digital ecosystems, digital platforms, BIM, video, and laser scanning, AI, and cloud computing, big data, and data analytics, reality capture, blockchain, simulation, virtual and augmented reality, data standards, and interoperability, and vertical and horizontal integration. Given its scope, the book will be of interest to all construction industry and architectural professionals who want to learn about cutting-edge technologies applied to construction. **Locally Relevant ICT Research** Kirstin Krauss, Marita Turpin, Filistea Naude, 2019-01-17 This book constitutes the refereed proceedings of the 10th International Development Informatics Association Conference IDIA 2018 held in Tshwane, South Africa, in August 2018.
