Data Science Doug Rose, 2016-11-17 Learn how to build a data science team within your organization rather than hiring from the outside Teach your team to ask the right questions to gain actionable insights into your business Most organizations still focus on objectives and deliverables Instead a data science team is exploratory They use the scientific method to ask interesting questions and run small experiments Your team needs to see if the data illuminate their questions Then they have to use critical thinking techniques to justify their insights and reasoning They should pivot their efforts to keep their insights aligned with business value Finally your team needs to deliver these insights as a compelling story

Insight How to Build Data Science Teams that Deliver Real Business Value shows that the most important thing you can do now is help your team think about data Management coach Doug Rose walks you through the process of creating and managing effective datascience teams You will learn how to find the right people inside your organization and equip them with the right mindset The book has three overarching concepts You should mine your own company for talent You can't change your organization by hiring a few data science superheroes You should form small agile like data teams that focus on delivering valuable insights early and often You can make real changes to your organization by telling compelling data stories These stories are the best way to communicate your insights about your customers challenges

and industry What You Will Learn Create data science teams from existing talent in your organization to cost efficiently extract maximum business value from your organization's data Understand key data science terms and concepts Follow practical guidance to create and integrate an effective data science team with key roles and the responsibilities for each team member Utilize the data science life cycle DSLC to model essential processes and practices for delivering value Use sprints and storytelling to help your team stay on track and adapt to new knowledge Who This Book Is For Data science project managers and team leaders The secondary readership is data scientists DBAs analysts senior management HR managers and performance specialists

Political Tribalism in America Timothy J. Redmond, 2022-10-18 The democratic ideal demands that the citizenry think critically about matters of public import Yet many Democrats and Republicans in the United States have fallen short of that standard because political tribalism motivates them to acquire perceive and evaluate political information in a biased manner The result is an electorate that is more extreme hostile and willing to reject unfavorable democratic outcomes In this work the author provides a host of actionable strategies that are designed to reduce the influence of political tribalism in our lives The text includes instructions for plumbing the depths of political views evaluating sources of political information engaging in difficult political conversations appraising political data and assessing political arguments The first of its kind this how to guide is a must read for partisans who want to become more critical political thinkers

Communicating with Data Deborah Nolan, Sara Stoudt, 2021-03-25 Communication is a critical yet often overlooked part of data science Communicating with Data aims to help students and researchers write about their insights in a way that is both compelling and faithful to the data General advice on science writing is also provided including how to distill findings into a story and organize and revise the story and how to write clearly concisely and precisely This is an excellent resource for students who want to learn how to write about scientific findings and for instructors who are teaching a science course in communication or a course with a writing component Communicating with Data consists of five parts Part I helps the novice learn to write by reading the work of others Part II delves into the specifics of how to describe data at a level appropriate for publication create informative and effective visualizations and communicate an analysis pipeline through well written reproducible code Part III demonstrates how to reduce a data analysis to a compelling story and organize and write the first draft of a technical paper Part IV addresses revision this includes advice on writing about statistical findings in a clear and accurate way general writing advice and strategies for proof reading and revising Part V offers advice about communication strategies beyond the page which include giving talks building a professional network and participating in online communities This book also provides 22 portfolio prompts that extend the guidance and examples in the earlier parts of the book and help writers build their portfolio of data communication

The Economist, 1959-06-27 *How to Lie with Statistics* Darrell Huff, 1973 **Голая статистика** Чарльз Уилан, 2016 *How to Lie with Statistics* D. Huff, 1969 **Dark Data** David J. Hand, 2022-02-15 Data describe and represent the world However no matter how big they may be data sets don't indeed cannot capture everything Data are measurements and as such they represent only what has been measured They don't necessarily capture all the information that is relevant to the questions we may want to ask If we do not take into account what may be missing unknown in the data we have we may find ourselves unwittingly asking questions that our data cannot actually address come to mistaken conclusions and make disastrous decisions In this book David Hand looks at the ubiquitous phenomenon of missing data He calls this dark data making a comparison to dark matter i.e. matter in the universe that we know is there but which is invisible to direct measurement He reveals how we can detect when data is missing the types of settings in which missing data are likely to be found and what to do about it It can arise for many reasons which themselves may not be obvious for example asymmetric information in wars time delays in financial trading dropouts in clinical trials deliberate selection to enhance apparent performance in hospitals policing and schools etc What becomes clear is that measuring and collecting more and more data big data will not necessarily lead us to better understanding or to better decisions We need to be vigilant to what is missing or unknown in our data so that we can try to control for it How do we do that We can be alert to the causes of dark data design better data collection strategies that sidestep some of these causes and we can ask better questions of our data which will lead us to deeper insights and better decisions

Misused Statistics, Second Edition Herbert Spirer, Louise Spirer, 1998-07-16 Revised and updated edition of a standard in the field Alerts readers to the problems inherent in statistical practice illustrating the types of misused statistics with well documented real world examples nearly half new to this edition drawn from a wide range of areas including the media public policy polls and surveys political elections and debates advertising science and health care and business and economics

I Hate Statistics! Professor Dr Abdul Rashid Khan, Associate Professor Ronan Conroy, Professor Dr Zulkifli Ahmad, 2012-08-28 *I Hate Statistics* has been written with the focus on the understanding of statistical reasoning and not on mathematical and theoretical underpinnings It aims to provide health professionals who

generally have a phobia about statistics with some basic understanding of the subject While this book can work as a very clear introductory text for the beginner it can also work well as the easy ongoing shelf reference What is especially valuable is that the essentials are all there in one short volume *Data in Society* Jeff Evans, This work analyses societal trends and controversies related to developments in data ownership access construction dissemination and interpretation looking at the ways that society interacts with and uses statistical data **Bad Data** Georgina Sturge, 2022-11-03 Essential reading An incisive and urgently needed book Tim Harford An entertaining introduction to the uses and misuses of data a penetrating analysis of why statistical literacy matters to our politics and our daily lives Professor Jonathan Portes Our politicians make vital decisions and declarations every day that rely on official data But should all statistics be trusted In BAD DATA House of Commons Library statistician Georgina Sturge draws back the curtain on how governments of the past and present have been led astray by figures littered with inconsistency guesswork and uncertainty Discover how a Hungarian businessman's bright idea caused half a million people to go missing from UK migration statistics Find out why it's possible for two politicians to disagree over whether poverty has gone up or down using the same official numbers and for both to be right at the same time And hear about how policies like ID cards super casinos and stopping ex convicts from reoffending failed to live up to their promise because they were based on shaky data With stories that range from the troubling to the empowering to the downright absurd BAD DATA reveals secrets from the usually closed off world of policy making It also suggests how once we understand the human story behind the numbers we can make more informed choices about who to trust and when
