The Physics of the Mind Phil Mollon, 2025-10-09 The Physics of the Mind New Perspectives for Psychotherapists Healers and Seekers is aimed at psychotherapists psychoanalysts healers and anyone interested in the interface of physics and the mind Both are interesting topics even more so when combined Phil Mollon's expertise is within psychology and over his long career he came to realise the importance of physics to the field In particular the branches that place mind and consciousness in the foreground of how we might understand the universe and our place within it There is a deep organising principle operating at all levels of the universe It gives rise to life and is apparent within the human mind in dreams and creativity A key lesson from quantum physics is that consciousness and the human mind are inextricably involved in the emergence of what we can observe and experience of our matter based realm In other words the behaviour of the quantum realm is shaped by our observation of it Just as we think of space time as shaped by gravitational forces and massive bodies so we can conceptualise mind space The latter contains mathematical correlithms of thought emotion and memory whereby what is similar attracts more of the same in a manner analogous to gravity These have effects within the mind and in the wider life field For example severe and repeated childhood trauma creates the equivalent of black holes in the mind space Metaphysics posits that our matter based universe is subtended within an infinite unified field of intelligence and creativity We are contained within a vast mind The principle is that unlimited guidance and knowledge is available via meditation and intuition requiring only that we seek It is never thrust upon us This is a book filled with extraordinary ideas to dip into wherever curiosity and intuition lead It is the author's fervent wish that what is within will stimulate thought and awareness and spark continuing creative concepts concerning our place in this cosmos

Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in

shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike

Hosting States and Unsettled Guests Jennifer Riggan, Amanda Poole, 2024-02-06 As wealthy countries build walls to keep migrants out countries in the Global South are celebrated for their hospitality towards refugees Hosting States and Unsettled Guests asks the question did these policies enable refugees to consider their new country home Beginning in 2016 Ethiopia promoted local integration economic opportunities and access to education for refugees in order to encourage them to stay long term rather than migrate towards Europe But by 2020 a political overhaul and the outbreak of war in Northern Ethiopia foreclosed these opportunities particularly for Eritrean refugees in Ethiopia How did Eritrean refugees envision their future in light of the discrepancy between promising policies and ongoing instability Using ethnographic interviews and participant observation with government officials NGOs and refugees in three camps in northern Ethiopia and Addis Ababa Jennifer Riggan and Amanda Poole explore refugee notions of progress care hope and futurity Caught at the intersection of teleological violence and temporal agency refugees endure the present and tenaciously produce a sense of the future even when their efforts to progress are repeatedly challenged An important read Hosting States and Unsettled Guests makes key empirical and theoretical contributions in forced migration studies East African studies anthropology and international education Riggan and Poole deftly shift the focus of refugee studies away from Europe to regions in the Global South to understand the violence of emerging forms of migration deterrence [The Publishers'](#)
