## **Jce Question Result 2014:**

**The Challenge of Governance in South Sudan** Steven C Roach, Derrick K Hudson, 2018-09-13 South Sudan is one of the world's most divided and unstable countries. Since achieving statehood in 2011, the country has plunged into civil war, 2013-15, and become the scene of some of the worst human rights abuses on the African continent. Despite ongoing political turmoil, states and international institutions have pledged enormous resources to stabilize the country and shore up the current peace process but have had limited influence in dealing with the effects of rampant corruption and factionalism. *The Challenge of Governance in South Sudan* examines the factors that continue to haunt peace building efforts, including the domination of the SPLM, A factionalization, corruption, human rights atrocities, an ineffective constitution, and the role of international actors. It brings together a diverse set of leading scholars to reflect on these factors and propose ways of promoting peace and stability in South Sudan. In particular, the book asks whether the disparity between domestic priorities, policies, and foreign intervention strategies has prevented the peace process from moving forward. The contributors probe this issue by addressing the flaws of past peace agreements, poor governance, a weakly articulated peacekeeping mission, US foreign policy, and a lack of moral accountability. This book is perfect for students, scholars, and policy makers with an interest in the challenges faced by the world's newest country.

**Advanced Statistics in Criminology and Criminal Justice** David Weisburd, David B. Wilson, Alese Wooditch, Chester Britt, 2021-10-21 This book provides the student researcher or practitioner with the tools to understand many of the most commonly used advanced statistical analysis tools in criminology and criminal justice and also to apply them to research problems. The volume is structured around two main topics, giving the user flexibility to find what they need quickly. The first is the general linear model, which is the main analytic approach used to understand what influences outcomes in crime and justice. It presents a series of approaches from OLS, multivariate regression, through logistic regression and multinomial regression, hierarchical regression, to count regression. The volume also examines alternative methods for estimating unbiased outcomes that are becoming more common in criminology and criminal justice, including analyses of randomized experiments and propensity score matching. It also examines the problem of statistical power and how it can be used to better design studies. Finally, it discusses meta-analysis, which is used to summarize studies and geographic statistical analysis, which allows us to take into account the ways in which geographies may influence our statistical conclusions.

**Translating Guilt** Cassandra Steer, 2017-02-26 This book seeks to understand how and why we should hold leaders responsible for the collective mass atrocities that are committed in times of conflict. It attempts to untangle the debates on modes of liability in

international criminal law ICL that have become truly complex over the last twenty years and to provide a way to identify the most appropriate model for leadership liability A unique comparative theory of ICL is offered which clarifies the way in which ICL develops as a patchwork of different domestic criminal law notions This theory forms the basis for the comparison of some influential domestic criminal law systems with a view to understanding the policy and cultural reasons for their differences There is a particular focus on the background of the German law which has influenced the International Criminal Court so much recently This helps to understand and seek a solution to the current impasses in the debates on which model of liability should be applied An entire chapter of the book is devoted to considering why leaders should be held responsible for crimes committed by their subordinates from legal moral and pragmatic perspectives The moral responsibility of leaders is translated into criminal liability and the different domestic models of liability are translated to the international context in such a way as to appeal to advanced students of ICL academics and practitioners who want to understand the complexities of leadership liability in international criminal law today and identify the best way to approach it Cassandra Steer is Executive Director of Women in International Security Canada and Junior Wainwright Fellow at McGill University Canada She holds a Ph D in Law from the University of Amsterdam The Netherlands
