Hayward,2020-03-01 Drawing on over fifty years of on the ground experience Fred M Hayward s Transforming Higher Education in Asia and Africa analyzes change processes in higher education in eight Asian and African countries The twelve cases range from the push to upgrade and transform higher education in Afghanistan in the midst of a war to the successful struggle against apartheid in South African institutions as well as thwarted efforts in Sierra Leone and Madagascar Providing both practical lessons learned and hope for communities globally Hayward demonstrates that higher education change and even transformation which is more fundamental and structural can occur even in the most difficult environments Successful transformation requires well crafted strategic and budget plans with careful implementation monitoring and effective leadership at multiple levels Yet also critical are a commitment to human development a desire for freedom and belief in democracy and recognition that high quality higher education is essential to national development Fertilizer subsidies in Malawi: From past to present Benson, Todd,De Weerd, Joachim,Duchoslav, Jan,Masanjala, Winford,2024-02-12 Malawi has been at the center of the debate on agricultural input subsidies in Africa ever since it significantly expanded its fertilizer subsidy program about two decades ago When it did so Malawi was a trailblazer receiving international attention for seemingly leveraging the subsidy program to move the country from a situation characterized by food deficits and widespread hunger to crop production surpluses In this paper we trace the history of Malawi s subsidy program over the past 70 years describing how the country arrived at that watershed moment earlier this century and how the subsidy program has developed since We show how donor support for the program has wavered and how external pressure to remove the subsidy has repeatedly been unsuccessful We also demonstrate how over the years the program s total fiscal burden has fluctuated

significantly. However, we find that since the expansion of the subsidy program in 2004, the fiscal costs of the program have shown little correlation with the maize harvest that same agricultural season. We show that the subsidy program has succeeded in raising awareness about the value of the fertilizer for increased crop productivity. However, despite its continued prominence in the country's agricultural policy, most Malawian smallholders do not manage to grow sufficient maize to feed their households throughout the year, and every year millions depend on food assistance during the worst months of the lean season.
