Engineering Design and Mathematical Modelling Nnamdi Nwulu, Mammo Muchie, 2020-12-17 Engineering Design and Mathematical Modelling Concepts and Applications consists of chapters that span the Engineering design and mathematical modelling domains Engineering design and mathematical modelling are key tools techniques in the Science Technology and Innovation spheres Whilst engineering design is concerned with the creation of functional innovative products and processes mathematical modelling seeks to utilize mathematical principles and concepts to describe and control real world phenomena Both of these can be useful tools for spurring and hastening progress in developing countries They are also areas where Africa needs to skill up in order to build a technological base The chapters in this book cover the relevant research trends in the fields of both engineering design and mathematical modelling This book was originally published as a special issue of the African Journal of Science Technology Innovation and Development Thus Until Emilia Ilieva, Reuben Matheka, 2025-08-04 Thus Until A History of Egerton University is a thorough historical chronological and well researched account of Egerton University from a whites only college when it started in 1939 through to the expansion it has experienced over the years culminating in being a full university More than any other university in Kenya Egerton has a long and colourful history but like all the other universities it has suffered from the political economic and financial challenges of the time especially since the double intake of the 1990s Chapter One provides the required background to the study highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived The chapter dispels some of the popularly held myths about him Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all white establishment The chapter ends with Africans beginning to agitate for change With great attention to detail the later chapters put the university in a broader local and international context thereby increasing its relevance to society A History of Egerton University though heavily footnoted and with a detailed bibliography is written in a simple easy flowing and accessible style Survivor-Centred Justice Ingrid Roestenburg-Morgan, Tim Murithi, 2025-02-04 This volume interrogates global perspectives and issues that constitute and characterize survivor centred justice exploring both conceptual and theoretical issues surrounding the definition of a survivor practical considerations of what constitutes a survivor centred approach to justice and available avenues of justice for survivors of mass atrocities In the first part of the book survivor centred justice is explored at the level of the International Criminal Court ICC The second part evaluates developments taking place at the local and domestic levels where traditional customary or local justice mechanisms find affinity with survivors in their quest for justice The third part focuses on advocacy based approaches being utilized specifically by non governmental organizations NGOs multilateral and regional institutions such as the United Nations and

African Union in support of survivors In the final part of the book future prospects for survivors in the promotion of peacebuilding and atrocity prevention are discussed The discussions in this volume will be of particular value and importance to international and transitional justice scholars including legal and development practitioners interested in survivor centred approaches to mass atrocity crimes Most importantly it aims to be of value to survivors survivor communities and survivor centred networks

Application and Mechanism of Plant Biostimulants, Biochar, Fertilizer Products, and Other Nutrition-related Agrochemicals Rabia Nazir,Roberto Ruggeri,Joao Antonangelo,Meng Xu,2025-06-17 Since the invention of synthetic ammonia through the Haber Bosch process a significant amount of chemical fertilizer has been utilized to enhance plant productivity However the low efficiency of common fertilizers used for plant nutrition not only leads to the wastage of valuable resources but also contributes to environmental pollution and ecological imbalance Overall health encompassing soil health environmental health and human health calls for new more efficient and environmentally friendly agrochemicals The innovation in plant nutrition related agrochemicals including new fertilizer products is an essential method to improve the efficiency of plant nutrient use addressing the challenges posed by global population growth resource shortage and environmental crisis The updated and upgraded agrochemicals including plant biostimulants biochar fertilizer products plant nutrition regulators and other nutrition related agrochemicals play a crucial role in enhancing plant productivity and promoting agricultural sustainability This article collection aims to bridge the gap between potential advancements in both listed and unlisted agrochemical products while advancing plant product interrelation mechanisms behind their application effects Recent advancements could offer significant opportunities for more scientific management of plant nutrition through application effects and innovative mechanisms Products of biostimulants have emerged in an endless stream and have been used more widely in horticultural crops Value added fertilizers produced by incorporating bioactive substances into conventional fertilizers are on the rise in China Organic substances applied to plant production also enrich the theory of plant organic nutrition Furthermore innovative agricultural inputs like coated fertilizers nano fertilizers fertilizer additives biochar and microbial preparation have the potential to enhance crop production while reducing reliance on traditional chemical inputs
