Modern Dairy Technology R. K. Robinson,2012-12-06 As with the products and processes described in Volume I of this book many of the technical changes associated with for example the manufacture of cheeses or fermented milks have been subtle rather than dramatic Nonetheless the importance for the dairy industry has often been profound The market demand for dairy products containing health promoting cultures is a development that was barely discernible 10 years ago and yet many manufacturers are now generating a whole range of bio yoghurts and similar retail items Similarly the legislation covering food hygiene has been modified to place additional demands upon manufacturers a move that has in turn encouraged the further development of analytical methods for quality control These modifications to manufacturing practices are along with many others reflected in this second edition and I acknowledge with gratitude the enthusiastic co operation of all the authors associated with this project in bringing their disparate contributions up to date R K ROBINSON v Preface to the First Edition Retail sales of most dairy products are still on the increase world wide and this expansion is at least in part a reflection of the fact that prices have tended to remain at a competitive level *Medical Device Register* ,2005 Contains a list of all manufacturers and other specified processors of medical devices registered with the Food and Drug Administration and permitted to do business in the U S with addresses and telephone numbers Organized by FDA medical device name in alphabetical order Keyword index to FDA established standard names of medical devices
