- Data is raw, unprocessed facts, have no meaning
 - Considered building blocks of information
 - Raw data must be properly formatted for storage, processing and presentation
- Information is data that has been processed to reveal meaning
 - Processing data is as simple as organizing data to reveal its meaning or as complex as making forecasts or drawing inferences using statistical modelling
 - Accurate, relevant and timely information is key to good decision making
 - Good decision making is key to survival in the global environment
 - Processing of data into information, generates 'actionable' knowledge
- Data Management : discipline that focuses on the proper generation, storage and retrieval of data (addition, deletion, modification, listing)
 - Core activity of any business
 - Database : shared, integrated computer structure that houses a collection of related data
 - Contains :
 - End user data : raw facts
 - Metadata : data about the data characteristics and relationships
 - Provides a description of data characteristics and relationships in data
 - Compliments and expands value of data
- Database management system : collection of programs that manage the database structure and controls access to the data stored in the database
 - 'Very well organized electronic filing cabinet' ,where the powerful software (DBMS) helps manage the cabinet's contents
 - Advantages :
 - Makes data management more efficient and effective
 - Promotes integrated view of organization's operations
 - Probability of data inconsistency is greatly reduced
 - Possible to produce quick to ad hoc queries (spur of the moment queries)
 - Improved data sharing - end-user access to more/better managed data
 - Improved data security - provides a framework, for security enforcement
 - Better data integration - wider access, integrated view of organization's operations
 - Minimized data inconsistency - data inconsistency is where different versions of the same data yield inconsistent results.
 - Improved data access - quick access to ad hoc queries
 - Improved decision making - improved access
 - Increased end-user productivity - through the availability of data, information is usable, enables user to make quick, informed decisions
