Hypermodernity and Visuality , Peter R. Sedgwick, 2019-04-29 This book engages with the question of making sense of seeing in today's technologically dominated world It does so by exploring the notion of the hypermodern a term which is used to capture the drive in contemporary culture to achieve ever greater speed and efficiency The volume draws principally on the thought of Paul Virilio and Friedrich Nietzsche The text's key argument is that destabilizing tendencies which become increasingly evident in hypermodern culture spring from its having a dual character This duality turns on hypermodernity's uncomfortable unstable and possibly unsustainable relation to its own past The volume engages with this dual character in a unique way Its discussions are prefaced by poems and photographic images which together frame and permeate the text's arguments and analyses Part One offers linked engagements with Virilio's articulation of the hypermodernized cultural visual environment Nietzsche's accounts of history power and archaic viscosity and briefer discussions of various other writers Part Two presents a creative elaboration of these engagements through a combination of poetry image and aphorism Through this combination the digital image a quintessentially hypermodern form of representation is turned against itself to allow for reflection on the ethics and politics of seeing today The volume concludes with an open ended dialogue on visual culture the archaic and the hypermodern **Tit-bits from All the Most Interesting Books, Periodicals and Contributors in the World** ,1883 **Congressional Record** USA.
