Discovery may well have started in the 15th century but for the British the 19th century saw the rise of the British Empire
and an explosion in world travel The travel narratives written during this century were profuse and by some estimates more
travel narratives were written during the first half of the 19th century than in all preceding centuries These accounts tell of
wondrous zoological and botanical finds of topography never before imagined and of exotic peoples as well At the time there
was one publisher John Murray known for its utter domination of the travel narrative field The caliber and profile of their list
was known throughout the UK and Europe and into the US as well The authors of the house included Jane Austen Lord Byron
Washington Irving and Sir Walter Scott And in its list of travel writing and exploration the house boasted the authors Charles
Darwin and Charles Lyell Murray's name became as synonymous with travel writing and exploration as it was with literary
giants Travels into Print is a tour through the archives and files of the House of Murray and marvelous expedition in the
geography of travel and exploration writing knowledge and reception in the 19th century Rather than focusing on narratives
of a particular region or scientific area of interest or particular period the work uses a source that cuts across all of these
areas the publisher Steeped in book files and correspondence about edits and revisions sent between Murray and his staff
and explorers the book addresses the ways in which the texts were written the role of truth in the accounts correspondence
as a form of production and the writings as travel documents This is a wonderful history of the book told from the perspective
of a legendary book and author maker **The New Volumes of the Encyclopaedia Britannica** ,1902 The New
