Goals and Self-assessment in the Middle School Learner Steven Rex Oare, 2007 With the intent of improving the teaching of practice strategies to young musicians the purpose of this multiple case study was to discover how students use goal setting and self assessment within their personal practice sessions and how these self regulative components affect strategy choice and motivation The specific questions were as follows a What goal setting and self assessment comments do novice adolescent instrumental musicians make during instrumental practice b What goal setting and self assessment strategies do novice adolescent instrumental musicians use during instrumental practice c Are there differences in practice

strategies found among students when they are deliberately involved in goal setting or self assessment compared to times when they are not setting goals or self assessment and d What strategies do students use to address various technical aspects of performance This study entailed the observation of middle school aged instrumental music students N 6 during their individual practice Two students were in eighth grade and four were in seventh grade The students played flute N 2 clarinet N 1 saxophone N 2 and trombone N 1 Data was collected via field notes videotape analysis of three practice sessions per student along with concurrent and retrospective verbal reports focus group interviews before and after the observation cycle commenced and concluded and an interview with the students band director Data were analyzed within cases and across cases for emergent themes Four themes were found to describe a cyclical practice process in which students moved from motivation to goal setting to strategy use to assessment and back to motivation Each stage of the cycle seemed to drive other stages Students with learning goal orientations seemed to practice more effectively than students with performance or time orientations Student goals tended to lack specificity which negatively influenced student choice of practice strategy and self assessment Three external factors were found that had a strong influence on the practice cycle including teachers musical aural image and learning development These three factors wove their way through all four stages of the practice cycle
