Things Great and Small John E. Simmons, 2024-03-18 Collection care is a fundamental responsibility for museums and other collecting institutions and the foundation of collection stewardship is good collection management policies. The new third edition of *Things Great and Small* continues to be a comprehensive resource for developing, implementing, and revising collection management policies and includes new information for addressing prolonged or permanent closure of museums, wider parameters for collection storage environments, and sustainable collection management practices to cope with climate change. Drawing on more than 50 years of experience as a collection manager, educator, consultant, and AAM Museum Assessment Program peer reviewer, John E. Simmons reviews the most recent collection management thinking and literature, helps determine which policies an institution needs, and provides guidance on policy content. In this new edition, coverage of critical areas is expanded, including digital objects, intellectual property rights, deaccessioning, decolonization standards, and best practices, collection storage environment parameters, managing off-site storage facilities, health and safety laws and regulations, risk management, and sustainable collection management practices. With more than 50 tables and charts and model policy templates, this major publication is aimed at museums of all kinds, historic houses and sites, and other collecting institutions.

Museums and Digital Maturity Lauren Vargas, Katherine Jones, 2025-10-29 Museums and Digital Maturity helps museums to understand why they should assess their digital maturity and explains how to undertake an assessment, even if an institution has a lack of dedicated funding or digital expertise. Informed and influenced by business development models and practices, the book demonstrates how museum professionals can draw upon business language and tools to assess their institution's digital maturity. Explaining how to select the right tools and resources for assessment, who to involve in the assessment process, and identify what is needed to sustain transformation, Vargas and Burton Jones demonstrate how professionals can adopt a strategy that will assist the cultural institution to master the increasingly complex digital landscape. Taking account of the unique context of each institution, this book does not advocate the use of any one digital maturity assessment. Instead, it helps museums to evaluate the tools and methods, decide what is best for them, and then make changes to one area at a time, thereby helping the institution to become more digitally mature. Museums and

Digital Maturity includes a series of case studies and prompts that will be useful to practitioners and leaders working in museums around the world. The prompts will help readers to make sense of the concepts discussed within the text and will be particularly useful to students engaged in the study of museums heritage and arts management.
