Duncan Scott Brown, 2021-08-15 Get one before one gets you Motion Performance's catchy sales pitch for builder Joel Rosen
s Phase III Specialty Muscle Cars sums up the escalating performance scene in the late 1960s Special edition muscle cars
were essential to keep pace Joel and other independent car builders such as Carroll Shelby George Hurst Dick Harrell Mr
Norm and Jim Wangers did what the factories couldn't do take the muscle car and turn it into a tire burning monster
Although the Pontiac GTO established the muscle car category in 1964 a host of corporate safety restrictions restrained
factories from offering turn key race cars off the showroom floor Independent car builders enhanced appearance and
amplified performance in an attempt to do what the manufacturers wouldn't Motion Performance issued a written guarantee
Phase III cars would run 11.5 at 120 mph down the quarter mile Some of the most iconic nameplates in automotive history
were applied in this era with names that included Cheetah Black Panther Royal Bobcat Super Huger Manta Ray Super
Snake Deuce Fast Track and The Machine How did manufacturers stealthily promote these special edition muscle cars as
halo cars while pretending not to endorse them What happened to these innovators when factories assimilated their ideas It's
all covered inside Muscle car historian Duncan Brown takes us through these special edition muscle cars their creators and
the behind the scenes forces that shaped these wild beasts into legends that left a lasting legacy **Ford Mustang**

Ford modular engine is a popular swap for 1964-1973 Mustangs Fox Body Mustangs trucks hot rods and other muscle
cars because these high tech engines provide exceptional performance and improved economy compared to their dated
counterparts Found in Mustangs and other Fords since the 1990s installing a modular motor in a classic Ford infuses new
technology and all the benefits that come with it into a classic car Modular engines feature an overhead cam design that has
massive horsepower potential and are offered in 4.6 5.0 5.2 5.4 and 5.8 liter iterations These high tech 2.3 and 4 valve
engines are readily available as a crate engine from salvage yards and in running cars This engine design has a large
physical footprint and swapping the engine requires a thorough plan using the proper tools and facilities Author Dave
Stribling specializes in modular engine swaps and expertly guides you through each crucial step of the engine transplant
process Because of the large physical size many components such as brake boosters steering rods and boxes and other
underhood components may need repositioning or modification to co exist in the engine bay Stribling covers motor mount

selection and fabrication suspension and chassis modifications aftermarket suspension options firewall and transmission tunnel modifications engine management and wiring procedures fuel systems exhaust systems electrical mods and upgrades and much more Many older Ford muscle and performance cars are prime candidates for a modular swap however shock towers protrude into the engine bay of these cars so modifications are necessary to fit the engine into the car which is also covered here Swapping the engine and transmission into a muscle car or truck requires specialized processes and this insightful explanatory and detailed instruction is found only in this book If you are considering swapping one of these high tech engines into a non original chassis this book is a vital component to the process
