Three bodies of research are critically reviewed to achieve this goal: i) theories of language learning that attribute critical roles to prior experience in explaining second language development; ii) empirical studies of second language learning that have investigated roles for crosslinguistic influence; and iii) instructional studies that have supported second language learning by addressing the negative effects of crosslinguistic influence. Using this foundation, new research directions and theorization in the field of second language acquisition are proposed. This book will serve as an excellent resource for students and scholars with interests in instructed second language learning, applied linguistics, cognitive psychology, psycholinguistics, and language education. *Proceedings of the Tenth International Congress of Phonetic Sciences* A.
