The Enderman is the most sinister of the neutral mobs, but it has not always been neutral. There was a time where, like every other mob, the Enderman would attack humans with a heavily damaging blow whenever it had the chance, along with its ear-piercing hiss and teleportation. Though deemed extinct for many centuries, the black and skinny Enderman with its tall, looming body and great speed has still been haunting the dreams of humans with its glowing purple eyes. During this time, there have been no sightings of Endermen in the actual world of Minecraft. One day, however, our friend Steve, a very skillful monster-slaying human, sighted this long-forgotten monster during a mining adventure. Steve then made it his mission to make peace with this species that has begun to haunt him with unwelcome visits to his home. How exactly would Steve be able to survive this new threat with teleporting abilities? How exactly did the
