Henry Pettus Randall

Memorandum For Economics Grade 2013 November:

The Report: Mongolia 2014 Oxford Business Group, 2014-05-23 Since the country's transition from communism two decades ago the Mongolian economy has experienced rapid liberalisation. Sectors including ICT and insurance are expanding quickly and while the mining sector has been responsible for making Mongolia a rising star in the global economy there is great potential for further growth in all economic sectors. Politically stable and rich with natural resources Mongolia has emerged as a bellwether for investor confidence in recent years. The 2013 commercialisation of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia's mineral exports away from coal while the government is working to improve the investment environment by adopting the new Investment Law among other measures. Challenges do exist however from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems. In response the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness.

Teach Janice Koch, 2019-01-02 Teach is a concise introduction to education that challenges students' preconceived notions of teaching in order to transform them into reflective practitioners. Empathizing with the difficulties students face as they move from the college classroom to their own classrooms, revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession, making the philosophy of teaching and learning accessible and relevant. The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field while also including the Interstate Teacher Assessment and Support Consortium (InTASC) standards correlating with each chapter's content. With the guidance of this supportive text, students will gain vital exposure by engaging with professional standards from the very start of their career.

The Decline of America David D. Schein, 2018-02-13 *The Decline of America* offers a carefully documented analysis of the last seventeen U.S. presidents. These men, eight Democrats and nine Republicans, have shaped the last 100 years not only for America but for the world. Each president is profiled with unsparing scrutiny so we can see where it's all gone wrong. David Schein follows these critiques by proposing ways to improve America's outlook for the next 100 years before it's too late.

Failed Promises David M. Konisky, 2015-04-10 A systematic evaluation of the implementation of the federal government's environmental justice policies. In the 1970s and 1980s the U.S. Congress passed a series of laws that were milestones in environmental protection including the Clean Air Act and the Clean Water Act. But by the 1990s it was clear that environmental benefits were not evenly distributed and that poor and minority communities bore disproportionate environmental burdens. The Clinton administration put these concerns on the environmental policy agenda, most notably with a 1994 executive order that called on federal agencies to consider environmental justice issues whenever appropriate. This volume offers the first systematic, empirically based evaluation of the effectiveness of the federal government's environmental justice policies. The contributors consider three overlapping aspects of environmental justice: distributive justice or the

equitable distribution of environmental burdens and benefits procedural justice or the fairness of the decision making process itself and corrective justice or the fairness of punishment and compensation Focusing on the central role of the Environmental Protection Agency they discuss such topics as facility permitting rulemaking participatory processes bias in enforcement and the role of the courts in redressing environmental injustices Taken together the contributions suggest that despite recent environmental justice initiatives from the Obama administration the federal government has largely failed to deliver on its promises of environmental justice Contributors Dorothy M Daley Eileen Gauna Elizabeth Gross David M Konisky Douglas S Noonan Tony G Reames Christopher Reenock Ronald J Shadbegian Paul Stretesky Ann Wolverton

East-West Exposure 101 Kenneth Lan, 2019-09-16 I wrote this book to fulfil my lifelong curiosity For years I have been fascinated by the history of my undergraduate major How did I become a major of East Asian Studies during my undergraduate days How did such geographically oriented field of studies begin in some Canadian universities Why was there such a high demand for this unique discipline Are students genuinely fascinated by the educational value of this discipline Or are they interested in learning about the Pacific Rim in order to tool themselves for future opportunities there This book was completed through sources obtained during multiple from various Canadian university archives It does not reinforce an explicit one size fits all theory East Asian programs highlighted were established under different heads of universities But all of them one thing in common Each was founded to accommodate the dynamics of Canadian foreign policy in the twentieth century history

Capital and the Common Good Georgia Levenson Keohane, 2016-09-27 Despite social and economic advances around the world poverty and disease persist exacerbated by the mounting challenges of climate change natural disasters political conflict mass migration and economic inequality While governments commit to addressing these challenges traditional public and philanthropic dollars are not enough Here innovative finance has shown a way forward by borrowing techniques from the world of finance we can raise capital for social investments today Innovative finance has provided polio vaccines to children in the DRC crop insurance to farmers in India pay as you go solar electricity to Kenyans and affordable housing and transportation to New Yorkers It has helped governmental commercial and philanthropic resources meet the needs of the poor and underserved and build a more sustainable and inclusive prosperity Capital and the Common Good shows how market failure in one context can be solved with market solutions from another an expert in securitization bundles future development aid into bonds to pay for vaccines today an entrepreneur turns a mobile phone into an array of financial services for the unbanked and policy makers adapt pay for success models from the world of infrastructure to human services like early childhood education maternal health and job training Revisiting the successes and missteps of these efforts Georgia Levenson Keohane argues that innovative finance is as much about incentives and sound decision making as it is about money When it works innovative finance gives us the tools motivation and security to invest in our shared future
