Principles of Clinical Medicine for Space Flight Michael R. Barratt, Ellen S. Baker, Sam L. Pool, 2020-01-02 In its first edition *Principles of Clinical Medicine for Space Flight* established itself as the authoritative reference on the contemporary knowledge base of space medicine and standards of care for space flyers. It received excellent notices and is used in the curricula of civilian and military training programs and used as a source of questions for the Aerospace Medicine Certifying Examination under the American Board of Preventive Medicine. In the intervening few years the continuous manning of the International Space Station has both strengthened existing knowledge and uncovered new and significant phenomena related to the human in space. The Second Edition incorporates this information. Gaps in the first edition will be addressed with the addition of new and revised chapters. This edition is extensively peer reviewed and represents the most up to date knowledge.

Managing Biotechnology Francoise Simon, Glen Giovannetti, 2017-09-01 A comprehensive overview of the new business context for biopharma companies featuring numerous case studies and state of the art marketing models. Biotechnology has developed into a key innovation driver especially in the field of human healthcare. But as the biopharma industry continues to grow and expand its reach, development costs are colliding with aging demographics and cost containment policies of private and public payers. Concurrently the development and increased affordability of sophisticated digital technologies has fundamentally altered many industries including healthcare. The arrival of new information technology and biotech companies on the healthcare scene presents both opportunities and challenges for the biopharma business model. To capitalize on new digital technologies from R D through commercialization requires industry leaders to adopt new business models, develop new digital and data capabilities and partner with innovators and payers worldwide. Written by two experts both of whom have had decades of experience in the field, this book provides a comprehensive overview of the new business context and marketing models for biotech companies. Informed by extensive input by senior biotech executives and leading consultancies serving the industry, it analyzes the strategies and key success factors for the financing, development and commercialization of novel therapeutic products, including strategies for engagement with patients, physicians and healthcare payers. Throughout, case studies provide researchers, corporate marketers, senior managers, consultants, financial analysts and other professionals involved in the biotech sector with insights, ideas and models. JACQUALYN FOUSE PhD RETIRED PRESIDENT AND CHIEF OPERATING OFFICER, CELGENE. Biotech companies have long been innovators using the latest technologies to enable cutting edge science to help patients with serious diseases.
