Memorandum L O 2015 Term 1:

Chile International Monetary Fund. Western Hemisphere Dept.,2016-12-09 This 2016 Article IV Consultation highlights that GDP growth in Chile has been weak with activity slowing in October However conditions are in place for the economy to recover After expanding by a moderate 1.7 percent in 2016 growth is forecast to increase to 2 percent in 2017 Faster growth in main regional partners and more stable copper prices are expected to lift exports and investment The recovery is however projected to be gradual held back by slow wage and job growth and still low business confidence The financial sector appears healthy Banks profitability is declining but capital buffers are adequate and nonperforming loan rates are low **Sri Lanka**

International Monetary Fund. Asia and Pacific Dept.,2016-06-14 This paper discusses economic performance outlook and risks of Sri Lankan economy Macroeconomic performance in 2015 reflected a mix between positive underlying growth momentum the negative impact of unbalanced domestic policies and an increasingly difficult external environment The government fiscal deficit expanded to 6.9 percent of GDP in 2015 The overall balance of payments deteriorated significantly in 2015 despite an improvement in the terms of trade Sri Lanka's short term outlook is challenging but medium term prospects are favorable if current macro financial imbalances can be addressed The key risks to the outlook stem from 1 government inaction on key policies and 2 a significant deterioration in the external environment **Norway** International Monetary Fund. European Dept.,2016-07-05 The paper examines the nature and scale of spillovers to a number of European countries from monetary policies in the euro area and the United States using three different approaches The analysis focuses on selected non euro area countries in Europe the Czech Republic Denmark Hungary Poland and Sweden Recent developments in these countries sovereign bond yields and exchange rates are indicative of potential spillovers The paper's most consistent analytical finding is for spillovers to lower domestic bond yields with the potential for repercussions on credit expansion and asset prices More recently the event study uncovered evidence of upward pressure on the exchange rate
