laboratoire dans l'instauration et la surveillance d'un traitement antibiotique Le point sur les techniques actuelles Les d
marches allant de l'approche pasteurienne la biologie moléculaire des techniques classiques de base aux automates et l
informatique Les OGM, quels dangers ? Gilberte Caye, 2014-01-01 Le point de départ de cet ouvrage fut la consultation
des inquiétudes et des interrogations des internautes sur les OGM Elles se regroupent en trois thèmes majeurs qui font
chacun l'objet d'un chapitre L'ADN et la technique de transfert des gènes ou le gène greffé est un fragment de séquence d
ADN Ce transgène provoque la synthèse d'une molécule protéique particulière celle qui confère à la plante sa résistance aux
insectes ou à certains herbicides Le danger des OGM dans l'alimentation dépend de la nature de la protéine fabriquée par la
plante vivrière à partir du transgène en particulier les OGM résistants aux insectes sont mortels pour eux donc pour les
abeilles et dangereux à long terme pour les autres consommateurs animaux ou humains Les effets des OGM sur l
environnement sont liés en particulier à l'utilisation intense des herbicides dans les plantations d'OGM résistants à ceux-ci et
à la possibilité de contamination des cultures traditionnelles par les plants OGM de même espèce Les herbicides participent
avec les insecticides et les engrais à la pollution des cours d'eau et des océans Les OGM actuels ont été créés et répandus
grâce à une législation favorable au mépris de la santé du consommateur Néanmoins la transgénèse chez les plantes
cultivées est actuellement une technique bien maîtrisée qui peut être utilisée dans des programmes utiles d'amélioration des
plantes à condition que la molécule fabriquée à partir du transgène soit connue testée et reconnue sans danger pour le
consommateur Dealing with Interests, Values and Knowledge in Managing Risk OECD Nuclear Energy Agency, 2004 This
publication is the fourth workshop of the OECD NEA Forum on Stakeholder Confidence and focused on the issue of Dealing
with interests values and knowledge in managing risk in the particular context of Belgium and the local partnerships formed
for the long term management of low short lived radioactive waste The proceedings promote the idea of developing an
integrated proposal to the national Government to construct a disposal facility for such waste The general consensus is that
stakeholder involvement has been beneficial particularly where partnerships have formed amongst representatives of local
organizations and that the best practice approaches adopted can be of value in an international context **Material**
