#### Caution on heat generation

- This unit incorporates a cooling fan on the rear to deal with the large amount of heat generation. The fan starts rotating automatically when the internal temperature of the unit rises above the set point and never stops the rotation after rotation.
- Maintain clearances of more than 10 cm on the left and right, vertical and above the unit. When the unit is installed in a rack, do not close left with a door.
- The cooling fan of this unit is designed to absorb external air. A curtain or sheet of paper is placed in the unit, the internal temperature may rise, and the sound may not be produced when the protection circuitry is activated due to temperature rise. Please be careful against this.

To absorb heat radiation, leave a space about 10 cm between the unit and the walls of rack structure.
