Southwest Though gardening is beloved the world over the style of gardens themselves varies from region to region
determined as much by culture as climate In this series of illustrated essays John Dixon Hunt takes us on a world tour of
different periods in the making of gardens Hunt shows here how cultural assumptions and local geography have shaped
gardens and their meaning He explores our continuing responses to land and reworkings of the natural world encompassing
a broad range of gardens from ancient Roman times to early Islamic and Mughal gardens from Chinese and Japanese
gardens to the invention of the public park and modern landscape architecture A World of Gardens looks at key chapters in
garden history reviewing their significance past and present and tracing the recurrence of different themes and motifs in the
design and reception of gardens throughout the world A World of Gardens celebrates the idea that similar experiences of
gardens can be found in many different times and places including sacred landscapes scientific gardens urban gardens
secluded gardens and symbolic gardens Featuring two hundred images this book is a treasure trove of ideas and inspiration
