

Team Building Lesson Plan

Topic

Team Building

Overview and Purpose

The Center for Children and Technology, in their Adventures in Supercomputing 1993-1994 Evaluation, found that "the size of the group a student worked in, and the sex of the students in that group, are important factors in the type of project work a student is able to accomplish in AiS." Furthermore, "groups of two or three students, and particularly all-female or mixed-sex groups, were most likely to achieve the integration of content understanding and mastery of computational strategies...."

This module provides the participants with methods to help their students develop the interpersonal skills necessary for successful team membership.
