## Managerial Accounting and the Business Environment

### Solutions to Questions

**1-1** Managerial accounting is concerned with providing information to managers for their use internally in the organization. Financial accounting is concerned with providing information to stockholders, creditors, and others outside of the organization.

**1-2** Essentially, the manager carries out three major activities in an organization: planning, directing and motivating, and controlling. All three activities involve decision making.

**1-3** The Planning and Control Cycle involves the following steps: formulating plans, implementing plans, measuring performance, and evaluating differences between planned and actual performance.

**1-4** The manager relies on feedback to assure that activities are under control; that is, to assure that things are going according to plan.

**1-5** A line position is directly related to the achievement of the basic objectives of the organization. A staff position is not directly related to the achievement of those objectives; rather, it is supportive, providing services and assistance to other parts of the organization.

**1-6** In contrast to financial accounting, managerial accounting: (1) focuses on the needs of the manager; (2) places more emphasis on the future; (3) emphasizes relevance and flexibility, rather than precision; (4) emphasizes the segments of

an organization; (5) is not governed by GAAP; and (6) is not mandatory.

**1-7** At the final assembly stage in a JIT system, a signal is sent to the preceding workstation as to the exact parts and materials that will be needed over the next few hours for the final assembly of products. Only those parts and materials are provided. The same signal is sent back through each preceding workstation so that a smooth flow of parts and materials is maintained with no buildup of inventories at any point. Thus, all workstations respond to the "pull" exerted by the final assembly stage.

The "pull" approach just described can be contrasted to the "push" approach used in conventional systems. In a conventional system, inventories of parts and materials are built up—often simply to keep everyone busy. These semi-completed parts and materials are "pushed" forward to the next workstation whether or not there is actually any customer demand for the products they will become part of. The result is large stockpiles of work in process inventories.

**1-8** A number of benefits accrue from reduced setup time. First, reduced setup time allows a company to produce in smaller batches, which in turn reduces the level of inventories. Second, reduced setup time allows a company to spend more time producing goods and less time getting ready to produce. Third, the ability to rapidly change from making one product to making another allows the company to respond more quickly to customers. Finally, smaller batches make it easier to spot

**Ebook: Managerial Accounting - Global Edition** Ronald Hilton, David Platt, 2014-09-16 We are pleased to present this Global Edition which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity based costing, target costing, the value chain, customer profitability analysis, and throughput costing, while also including traditional topics such as job order costing, budgeting, and performance evaluation. Many of the real world examples in the Management Accounting Practice boxes have been revised and updated to make them more current, and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.
