Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Academic Autoethnographies* Daisy Pillay, Inbanathan Naicker, Kathleen Pithouse-Morgan, 2016-02-10 *Academic Autoethnographies* Inside Teaching in Higher Education invites readers to experience autoethnography as a challenging complex and creative research methodology that can produce personally professionally and socially useful understandings of teaching and researching in higher education The peer reviewed chapters offer innovative and perspicacious explorations of interrelationships between personal autobiographies lived educational experiences and wider social and cultural concerns across diverse disciplines and university contexts This edited book is distinctive within the existing body of autoethnographic scholarship in that the original research presented has been done in relation to predominantly South African university settings This research is complemented by contributions from Canadian and Swedish scholars The sociocultural educational and methodological insights communicated in this book will be valuable for specialists in the field of higher education and to those in other academic domains who are interested in self reflexive transformative and creative research methodologies and methods This book illuminates how autoethnography can engage authors and researchers from varied epistemological backgrounds in a reflexive multilogue about who they are and what they do The creative representations of the lived experience of doing autoethnography sets the book apart both methodologically

and theoretically revealing how rigor and critical distance can serve to position autoethnography not only as a personal self development tool but a tradition and method in its own right Hyleen Mariaye Associate Professor Mauritius Institute of Education Mauritius This compelling book foregrounds autoethnography as an innovative and creative research methodology to generate reflexive sociological understandings of teaching and researching across disciplines in higher education Rich evocative and authentic accounts reveal unique possibilities for the transformation of teaching learning and research at personal professional and socio cultural levels Nithi Muthukrishna Professor Emerita University of KwaZulu Natal South Africa

Women, Economic Development, and Higher Education Diane E. Eynon, 2017-06-19 This book is a multi disciplinary exploration of the intersection relationship and connection between higher education economic development and gender in post Apartheid South Africa In just twenty years South Africa has rewritten its constitution restructured its macroeconomic growth and development policies restructured its higher education system and made a commitment to provide opportunity for all its citizens specifically those who have historically been marginalized women and blacks Eynon weaves together these unique perspectives to illustrate how these multiple domains map onto women and the critical role they play in the present and future of the country Gender equality and women s empowerment and education were considered key drivers to South Africa s transformation

Transcending Equality, Diversity and Inclusion at Work Marguerite L Weber, Hugo Gaggiotti, 2024-06-07 The book reflects on ways of transcending Equality Diversity and Inclusion EDI by establishing a dialogue between the professional experience of the authors and experts from academia and practitioners from financial services and executive search The book emphasises the link and impact between what is taught and what is learned about EDI and how this reflects on later choices in career and workplace status The book offers a critical and global perspective emphasizing the multilocality and intersectionality dimension of diversity and unpicks key insights from different conceptualizations like class gender and postcolonialism and their relationship with the current paradigm of diversity and how people identify and communicate With an extensive collection of testimonies and invitations for reflection the book doesn t limit the analysis to the influences of historical power relations in the workplace but investigates at what stage multicultural power structures start developing a compulsory inclination to create differences and how this can influence hiring decision making and management in the workplace In the book academics and practitioners provide illumination and insights gleaned from their own personal experiences and perspectives Whilst the research targeted financial services and executive search the book s findings will appeal globally to individuals of all age groups regardless of educational status seniority or in which industry they are employed particularly those who are aware of how each one expresses similarity and differences sometimes in not obvious ways
