University Skousen starts his micro section with Carl Menger's theory of the good and the profit and loss income statement to explain the dynamics of the market process entrepreneurship and the advantages of saving. Then he uses a powerful Hayekian four stage model of the economy to introduce macro including a new Austrian measure of spending at all stages of production. Gross Domestic Expenditures Economic Logic also offers chapters on The international gold standard the defects of central banking and the Mises Hayek theory of the business cycle. A full critique of the Keynesian Aggregate Supply and Demand AS AD model and a revolutionary Austrian alternative.
