Memorandum For Geography Paper November 2013:

The War Lawyers Craig Jones, 2020 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders. These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers. The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza. Drawing on interviews with military lawyers and others, this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft, drones and/or ground forces and with what results. This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood. Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable, contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence.

The Changing Practices of International Law Tanja Aalberts, Thomas Gammeltoft-Hansen, 2018-04-05 With more than 158 000 treaties and some 125 judicial organisations, international law has become an inescapable factor in world politics since the Second World War. In recent years, however, international law has also been increasingly challenged as states are voicing concerns that it is producing unintended effects and accuse international courts of judicial activism. This book provides an important corrective to existing theories of international law by focusing on how states respond to increased legalisation and rely on legal expertise to manoeuvre within and against international law. Through a number of case studies covering a wide range of topical issues such as surveillance, environmental regulation, migration and foreign investments, the book argues that the expansion and increased institutionalisation of international law itself have created the structural premise for this type of politics of international law. More international law paradoxically increases states' political room of manoeuvre in world society.

simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
