The Failure of the Voice Referendum and the Future of Australian Democracy Gabrielle Appleby, Megan Davis, 2026-01-13 Australia and Australians stood at a crossroads in October 2023 Before them lay a new and more accommodating way to practice democracy a future in which First Nations people were given a representative voice in political decisions in this country After months of a referendum campaign struggling over foundational ideals and questions of national identity misinformation disinformation and racism the proposal was overwhelmingly rejected in every Australian state and nationally The referendum campaign was Australia s first since the failed attempt at a republic in 1999 The political and media environment in which the referendum campaign would unfold was fundamentally changed These changes included the growth of social media growing distrust of major political parties and the rise of fake news and populist politics This book brings together a diverse set of perspectives to explore the many and complex political social and historical factors that influenced the conduct of the campaign and led to the loss It includes contributions from lawyers political scientists historians human rights experts health policy experts land rights campaigners and Indigenous affairs policy experts The contributors in this book include First Nations and non Indigenous authors often writing collaboratively The majority of the views offered based in expertise and experience are those of First Nations Their writings place the referendum loss in the context of political failure and attempts at structural reform and Australia s terrible record at amending the Constitution through referendums The book traces the legal and political development of the draft constitutional provision and the influence of legal risk on the campaign A major focus of the book is the impact of misinformation and disinformation which was rife during the campaign and media reporting of it The role that civil society and corporate Australia played in the campaign is considered The Voice campaign will be placed in the context of Aboriginal and Torres Strait Islander politics and previous attempts at representation The book will also place the call for Voice in the context of its ongoing relevance and imperative in Aboriginal and Torres Strait Islander affairs explaining the power of representation the Voice as an expression of sovereignty and the need for Voice to pursue other structural reforms such as treaty and to realise the promise of land rights The book concludes by reflecting on the role that history played in the campaign and the implications of the campaign

for the practice of Australian history The book holds lessons for future constitutional change Indigenous recognition structural reform and Australia's democracy It also looks with constructive pragmatism at the future direction of First Nations structural reform in Australia and the practice of democracy

The Europeanisation of Contested Statehood

George Kyris, 2016-03-09 The Europeanisation of Contested Statehood The EU in northern Cyprus acts as a case study of the impact of the EU on institutions political parties and civil society in contested states self-declared states which remain unrecognised in world politics Research drawn from qualitative analysis of official documents public discourse and interviews with various officials and political and social elites within the EU and at a local level provides new insights as to the impact of the EU on northern Cyprus as well as a fresh understanding of the relevance of the EU to contested states in general By doing so the book reflects on what contested statehood means for Europeanisation and lays out a conceptual template for the study of contested states of the wider European periphery such as those in the Caucasus Transnistria Kosovo or the occupied Palestinian territories which continue to represent specific challenges to the international affairs of the EU

Organizing

Your Own Say Burgin, 2024-04-16 The fascinating history of white solidarity with the Black Power movement In the mid 1960s as the politics of Black self-determination gained steam Black activists had a new message for white activists Go into your own communities and organize white people against racism While much of the media at the time and many historians since have regarded this directive as a white purge from the Black freedom movement Say Burgin argues that it heralded a new strategy racially parallel organizing which people experimented with all over the country Organizing Your Own shows that the Black freedom movement never experienced a white purge and it offers a new way of understanding Black Power's relationship to white America By focusing on Detroit from the mid 1960s through the mid 1970s this volume illuminates a wide cross-section of white activists who took direction from Black-led groups like the Northern Student Movement the City Wide Citizens Action Committee and the League of Revolutionary Black Workers Organizing Your Own draws on numerous oral histories and heretofore unseen archives to show that these white activists mobilized support for Black self-determination in education policing employment and labor unions It was a trial and error effort that pushed white activists to grapple with tough questions which white people should they organize and how which Black-led groups should they take direction from and when did taking Black direction become mere sycophancy The story of Detroit's white fight for Black Power thus not only reveals a broader richer movement but it carries great insight into questions that remain relevant
