El presente libro contiene textos de distintos países respecto de las principales dinámicas urbanas y territoriales observadas en las últimas tres décadas como consecuencia de la aplicación y elaboración de políticas y discursos neoliberales. Para ello la obra recoge los estudios de las ciudades de Santiago de Chile, Buenos Aires, Ciudad de México y Madrid y en ellas reconoce y explica la reestructuración política territorial y económica acaecida. En este sentido la obra constituye un aporte imprescindible para la comprensión y reflexión política del desarrollo urbano acontecido en estas cuatro ciudades durante las últimas décadas y permite por tanto la construcción de una crítica fundada de los principales efectos territoriales de la ideología neoliberal.

*Subsuelos* Florencia Qualina, 2020-09-14. El Premio de Ensayo Crítico invitaba a pensar problemas que recorrieran el arte argentino durante los últimos años, también sobre un corpus de obras o exhibiciones realizadas por artistas argentinos en los últimos quince años. Estas eran unas proposiciones abiertas que no podían haber emprendido sin meditar antes sobre otras variables que exceden al arte e implican algo más grande. Algo que indecorosamente podría ser llamado mundo. Quería pensar a partir de aquella noche que la escatología cibernética había bautizado Y2K, es decir desde el inicio del siglo. También percibiendo como André Breton que la sensibilidad jamás cambia radicalmente. Otra cuestión dispar: este ensayo cómo se filtra la modernidad en el arte contemporáneo. Una modernidad entendida como un sistema heterotópico integrado por manifiestos vanguardias y retaguardias técnicas, voluntades subversivas.
