carefully reviewed on the basis of actual installation data Cooling requirements are affected by all heat exchangers that are cooled by the fan drive system These may include radiators condensers charge air coolers or oil coolers Because of the variation in size shape configuration and mountings available in cooling fans and fan drive systems specific test devices have not been included Using known power speed relationships for a given fan this procedure can be used to calculate the fan drive system s power consumption for engine cooling systems using fixed ratio speed modulating and on off fan drives This power consumption may then be used in determining engine net power per SAE J1349 For fan power speed relationships refer to SAE J1339
