Management Information Systems Laudon 2014:

Management and Technological Challenges in the Digital Age Pedro Novo Melo, Carolina Machado, 2018-01-03

Businesses operate amid a digital age and unsurprisingly technology has engendered tools that now predominate all corners of the workplace. The ascendancy of new hardware and software poses new challenges for professionals in the field of management and human resources as corporations and companies routinely implement and incorporate digital software for goals such as improving worker productivity and tasks such as screening highly qualified candidates for vacancies. In the face of rapid change, professionals must investigate how the use of digital technology affects the culture of hiring processes, employee morale, company management, and corporate image. This book aims to promote research related to these new trends and open a new field within the areas of management and engineering. Through the course of nine chapters, contributors to *Management and Technological Challenges in the Digital Age* grapple with the theoretical and practical implications that technological usage carries across the range of small and large organizations in the world of business. Focuses on the latest research findings that are occurring in this field in different countries. Shows how companies around the world are facing today's technological challenges. Shares knowledge and insights on an international scale. Keeps the readers and researchers informed about the latest developments in the field and forthcoming international studies. Explains how the use of technology allows management to take a more strategic role in organizations. This book affords a thorough engagement with the progresses and setbacks made through the enlistment of technological equipment and computerized procedures in the field of human resources and management while interrogating the future challenges of technology's role.

Kenneth C. Laudon,Jane Price Laudon,Ahmed A. Elragal,2013 *Making a difference digitally. E-Commerce in South Africa*
Felix Deubert,2014-11-24 Master s Thesis from the year 2014 in the subject Business economics Trade and Distribution
grade 1 3 University Witten Herdecke language English abstract According to the South African B2C E Commerce Report 2012 South Africa was already in 2011 the fifth largest country in Africa in terms of the number of Internet users Today in 2014 there are approximately 12 5 million South African Internet users Since several years the E Commerce sector is facing a boom in South Africa However not everybody seems to profit from or participate in this boom Economically and socially South Africa is still deeply divided The inequality within the population the distance between rich and poor is extreme The richest 20 percent of the population account for almost 70 percent of total income the share of the poorest 20 percent is just under three percent Almost a third 31 9% of the population lives on the equivalent of less than 2 Dollars a day Around seven million people are considered long term unemployed with no job prospects especially those living in informal settlements the so called townships The social and economic inequality is a big problem for the country of South Africa E Commerce has the potential to resolve this problem as it is booming and companies plan to extend their businesses as well as their employee numbers The idea is to train people from the townships in order to get them to work in the E Commerce business Interesting for this thesis are those E Commerce companies with big storage halls as they are the ones who might be in need of untrained employees of the townships Jobs could be needed in basic positions such as picking and packing quality control and customer services in big warehouses Supposed it would be actually possible to use training initiatives and programs in the form of cooperations of E Commerce companies and township NGO s resulting in diminishing unemployment and leading to permitting more people participate in the boom of E Commerce the South African economy and its society as a whole would gain a tremendous benefit The research question in this master thesis is interlinking the existing economic boom of E Commerce with the high unemployment rate in the townships Does the fast growing E Commerce in South Africa have an effect on the high unemployment rate in the townships In the quest for an answer to this question attention is paid to two related questions as well Do the lowest social classes feel an improvement in their living standards after being hired by an E Commerce business *Management Information Systems* Kenneth C.
