- United States Federal Communications Commission, Code of Federal Regulations, 47 CFR, pt. 2, § 2.102.
- Institute of Electrical and Electronic Engineers (IEEE) IEEE C95.1.
- International Commission on Non-Ionizing Radiation Protection (ICNIRP).

- ANATEL, RESOLUÇÃO de Resolução No. 183 of September 10, 2006.

Transmit and Receive Procedure

Your two-way radio contains a transmitter and a receiver. To control your exposure and ensure compliance with the general population/uncontrolled environment exposure limits, always adhere to the following procedure:

- Transmit no more than 50% of the time.
- To receive calls, release the PTT button.
- To transmit (TX), press the Push-to-Talk (PTT) button in front of the face.
- Hold the radio in a vertical position with the microphone (and other parts of the radio including the antenna) at least one (1) m (3.3 feet) away from the face or lips. Holding the radio at a proper distance is important to ensure compliance.

Note: RF exposure decreases with increasing distance from the antenna.

- Body worn operation, when worn on the body, always place the radio in a holster-mounted (H), holster-mounted, case or body harness for this product. Please refer to the following websites for more information on safe RF energy exposure limits and how to control your exposure to ensure compliance with applicable RF exposure limits:
 - <http://www.fcc.gov/electronic/interference/faq>
 - <http://www.icnirp.org/interference/faq>
 - <http://www.anatec.com.br/interference/faq>

Two-Way Radio Operation

- Use only Motorola-approved supplied or replacement antennas, batteries, and audio accessories. Use of non-Motorola-approved antennas, batteries, and wired or wireless accessories may exceed the applicable RF exposure guidelines (IEEE, ICNIRP or FCC).
- For a full list of Motorola-approved accessories for your radio model, visit the following website: <http://www.motorola.com/TalkaboutAccessories>.

Electromagnetic Interference/Compatibility

Note: Nearly every electronic device is susceptible to electromagnetic interference (EMI) if inadequately shielded, designed or otherwise configured for electromagnetic compatibility.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This device complies with Industry Canada license-exempt RSS standards. Operation is subject to the following two conditions:
1. This device may not cause interference, and
2. This device must accept any interference received, including interference that may cause undesired operation of the device.

Radiation

To avoid electromagnetic interference and/or compatibility conflicts, turn off your radio in any facility where posted notices instruct you to do so. Hospitals or health care facilities may be using equipment that is sensitive to external RF energy. Always:

When instructed to do so, turn off your radio when onboard an aircraft. Any use of a radio must be in accordance with applicable regulations per national civil instructions. **Medical Devices** – Pacemakers, Defibrillators or other implanted Medical Devices

Persons with pacemakers, implantable cardioverter-defibrillators (ICDs) or other active implantable medical devices (AIMDs) must:

- Consult their physicians regarding the potential risk of interference from radio-frequency transmitters, such as portable radios (properly shielded medical devices may be more susceptible to interference).
- Turn the radio OFF immediately if there is any reason to suspect that interference is being placed.
- Do not carry the radio in a chest pocket or near the implanted area, and carry or use the radio on the opposite side of their body from the implantable device to minimize the potential for interference.

Hearing Aids

Some digital wireless radios may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining shielding.

Use of Communication Devices While Driving

Always check the laws and regulations on the use of radios in the areas where you drive.
• Give full attention to driving and to the road.
• Use hands-free operation, if available.
• Must define road and laws before making or answering a call, if driving conditions or regulations so require.

For Vehicle With Air Bags

Refer to the vehicle manufacturer's manual prior to installation of electronic equipment to avoid interference with air bag wiring. Do not place a portable radio in the area over an air bag or in the air bag deployment area. Air bags inflate with great force, and a portable radio is placed in the air bag deployment area and the air bag inflates, the radio may be propelled with great force and could become a projectile or even cause injury to occupants of the vehicle.

Potentially Explosive Atmosphere

Turn off your radio prior to entering any area with a potentially explosive atmosphere. Only radio types that are specifically qualified must be used in such areas as "intrinsically safe". Do not remove, install or charge batteries in such areas. Sparks in a potentially explosive atmosphere can cause an explosion or fire resulting in bodily injury or even death.

Note: The areas with potentially explosive atmosphere identified to above include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles (such as grain, dust or metal powders), and any other area where you would normally be advised to turn off your vehicle engine. Areas with potentially explosive atmospheres are often but not always posted.

Blowing Caps and Aeras

To avoid possible interference with blowing operations, turn off your radio when you are near electrical blowing caps. In a blowing area, or in areas posted "Turn off two-way radios". Obey all signs and instructions.

Operational Cautions

Antennas

Do not use any portable radio that has a damaged antenna. If a damaged antenna comes into contact with your skin, a minor burn can result.

Batteries

All batteries can cause property damage and/or bodily injury such as burns if a conductive material touches exposed terminals. The conductive material may complete an electrical circuit (short circuit) and cause a fire.

- Exercise care when removing battery or AA batteries. Do not use sharp or conductive tools to remove these batteries.
- Exercise care in handling any charged battery, particularly when placing it inside a pocket, purse or other container with metal objects.
- Do not discard your battery in a fire.
- Do not remove the battery in any area labeled "Prohibited Atmosphere". Any sparks created in a potentially explosive atmosphere can cause explosion or fire.
- Do not press against the battery, puncture, abuse or otherwise attempt to change the form of your battery.
- Do not dry a wet battery or insert battery with an electrode or metal surface, such as a hair dryer or microwave oven.
- If the new battery contact area has been submerged in water, dry and clean the battery contacts before attaching the battery to the radio.

Battery Charger Safety Instructions:

1. Turn the radio off when charging the battery.
2. Do not expose the charger to outdoor environment. Chargers must only be used indoors.
3. Do not operate or disassemble the charger. Do not use a charger that has been damaged or damaged in any way.
