Configurations of Migration Jennifer Leetsch, Frederike

Middelhoff, Miriam Wallraven, 2023-10-24 In a global context in which phenomena of migration play an ever more important role the ways individual and collective experiences of migration are covered in the media represented in culture and interpreted are coming under increasing scrutiny This book explores the complex relationship between creative engagements with migration on the one hand and forms of knowledge about migration on the other inquiring into the ways aesthetic practices are intertwined with knowledge structures The book responds to three pressing research questions First it analyses how fictional texts plays images films and autobiographical accounts mediate forms of knowledge about migration Second it identifies the ways in which specific media approaches and aesthetic practices influence people's ideas about and awareness of migratory experiences in a globalized world Finally it delineates how historical perspectives help us compare epistemological approaches to migration in the nineteenth twentieth and early twenty first centuries and how these approaches affect the way critics and the public responded to and thought about different forms of forced migration Bringing together renowned scholars working across disciplines it investigates the possibilities and limitations that different media present when it comes to reflecting on communicating and imagining experiences of migration and how these representations in turn create ways of knowing and understanding migration
