Memorandum Business Studies November 2013 Grade 11:

Handbook on Hybrid Organisations David Billis, Colin Rochester, 2020-02-28 Hybrid Organisations that integrate competing organisational principles have become a preferred means of tackling the complexity of today's societal problems. One familiar set of examples are organisations that combine significant features from market public and third sector organisations. Many different groundbreaking approaches to hybridity are contained in this Handbook which brings together a collection of empirical studies from an international body of scholars. The chapters analyse and theorise the position of hybrid organisations and have important implications for theory practice and policy in a context of proliferating hybrid forms of organisation.

Restoring the Promise Richard K. Vedder, 2019-05-01 Higher education in America is in crisis. Costs are too high, learning is too little and the payoff to students and society is increasingly problematic. In *Restoring the Promise* Richard Vedder shows how the precarious position of colleges and universities results from a mostly unsuccessful expansion of governmental involvement in the academy especially at the federal level. The book examines today's most serious issues in higher education including free speech and academic freedom, tuition and other costs, culture and curricula, governance, gender, race and diversity, due process, admissions, student loans and much more. It diagnoses problems and identifies solutions. For example, the total cost of college per student in the United States is now higher than in any other country. When combining the monetary costs of college with the opportunity costs of losing years of labor to the economy, the true cost of higher education to American society well exceeds one trillion dollars annually. Yet despite American higher education's immense price tag, students are learning less than ever before and continue to be underemployed. The book discusses the three I's of university reform: information, incentives and innovation. Without information, it is impossible for taxpayers and governing authorities to ensure that public education spending truly furthers the broader interests of society rather than the narrow interests of faculty and administrators. Shaping incentives for management would help to reduce costs and improve quality. Business practices such as Responsibility Centered Management (RCM) for example, allow profit to motivate efficiency and encourage learning outcomes. And expanding the use of innovation in technology and open online courses along with relinquishing old rules such as tenure and three month summer vacations offer new hope for institutions of higher education. The book discusses such additional reforms as the following: Ending or revising the federal student financial aid program; Giving departments or even professors a share of overall revenue based on student enrollments in their classes; Departments or professors would then be required to pay their share of travel, building, rental, maintenance, utilities and other such costs from the revenues they receive; Providing earnings data on former students by college five, ten or fifteen years after matriculation; Prospective students and parents as well as lawmakers and oversight officials would be assisted regarding school successes and failures; Increasing faculty teaching loads; Instituting three year degrees and year round instruction; Ending discrimination against for-profit schools; Ending grade inflation; Ending speech codes and other barriers to academic

freedom Ending affirmative action and related diversity programs And more **Sustainable Peace in Northeast Asia**
 Yong-Shik Lee,2023-09-05 Sustainable Peace in Northeast Asia examines the causes of lasting and complex tensions in the region from underlying political historical military and economic perspectives discusses their historical development and political economic implications for the world and explores possible solutions to build lasting peace The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances diplomacy trade and investment The book also discusses the influence of these external powers over the crisis their political and economic objectives in the region their strategies and the dynamics that their engagement has created Both South Korea and North Korea have sought reunification of the Korean peninsula which will have a substantial impact on the region The book examines its justification feasibility and effects for the region The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia A relatively small country in terms of its population Mongolia has rarely been examined in this context Sustainable Peace in Northeast Asia makes a fresh assessment of its potential role
