Journal Ranking Impact Factor Scopus

Stefanie Haustein

Journal Ranking Impact Factor Scopus:

Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

The Researcher's Journey Klaus Solberg Söilen, 2025-07-01 Navigating the academic ecosystem involves a variety of challenges that extend beyond the application of research methods. These challenges include understanding the university structure, academic conferences, publication strategy, securing research funding, and how modern technologies like artificial intelligence have changed the very purpose of researchers. Written in an engaging and accessible tone, this book guides advanced and early career researchers through the real world challenges that face academics in the social sciences. The book is divided into three parts. The first gives a brief history of the scientific method and social science research processes; the second critically addresses the current state of research methods in the social sciences; and the third discusses implications for ethics in light of scientific and technological advances.

Demystifying Scholarly Metrics Marc W. Vinyard, Jaimie Beth Colvin, 2022-02-25 Demystifying Scholarly Metrics gives librarians and faculty the confidence to navigate the maze of scholarly metrics, identify quality journals in which to publish, and measure the impact of scholarly works. Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics. This user-friendly book demystifies them, helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions. It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact. Several controversies exist in the scholarly metrics landscape, including a disagreement between the proponents of altmetrics and traditional bibliometrics. Even more contentious debates are breaking out over predatory journals and open access publishing. Authors Mark Vinyard and Jaimie Beth Colvin, who successfully launched a faculty publishing initiative, explain which aspects of metrics are truly essential to grasp and they place these numbers in context. They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape.

Research and Publication Ethics Nimit Chowdhary, Sunayana, Monika Prakash, 2024-06-03 This book provides a comprehensive overview of research and publication ethics and guides young researchers on how to conduct ethical research and publish their work responsibly. It presents an understanding of ethical practices in research and how they apply to research and publication by examining the different ethical theories and their application. The book also discusses the different factors influencing ethical decision making and probes into the ethical issues that can arise in the research process. It explores the different forms of scientific misconduct such as data fabrication and falsification, plagiarism,

and conflicts of interest and provides strategies for ethical research The book also details the impact of scientific misconduct on research and publication and the strategies for preventing and detecting misconduct Aligning to the belief that promoting ethical research practices is essential for advancing science and society this book will be helpful for young researchers scholars aspiring researchers and academicians interested in ethical research practices in multiple disciplines

Imperatives for Legal Education Research Ben Golder, Marina Nehme, Alex Steel, Prue Vines, 2019-08-28 In the last few decades university teaching has been recognised as an activity which can be studied and improved through educational scholarship In some disciplines this is now well established It remains emergent in legal education The field is rich with questions to be answered issues to be raised This book provides the first overall review of legal education scholarship The chapters outline the history of legal education research and provide a detailed analysis of the trends in areas of publication Beyond this the book suggests a typology for further conceptualising the field and a series of suggested paths for future research The book originated from the 2017 UNSW conference Research in Legal Education State of the Art It features internationally respected authors who bring their perspectives on how legal education as a field of research should be conceptualised The collection is arranged into three themes First a historical view is taken of the emergence of legal education scholarship and its roots that predate modern educational theory Secondly the book provides overviews of the extant field of publications highlighting areas of interest and neglect and delineating the trends in current publication Thirdly the book provides a set of suggested typologies for describing legal education research and a series of essays for future directions which both critique current approaches and provide inspiration for future directions The State of Legal Education Research represents an authoritative introduction to the field a set of conceptual tools with which to describe it and inspiration for researchers to expand and grow research into legal education

Research Methodology and Scientific Writing C. George Thomas, 2021-02-24 This book presents a guide for research methodology and scientific writing covering various elements such as finding research problems writing research proposals obtaining funds for research selecting research designs searching the literature and review collection of data and analysis preparation of thesis writing research papers for journals citation and listing of references preparation of visual materials oral and poster presentation in conferences and ethical issues in research Besides introducing library and its various features in a lucid style the latest on the use of information technology in retrieving and managing information through various means are also discussed in this book The book is useful for students young researchers and professionals
