

## **Research Paper on Law Enforcement Agencies: Policing, Management, & Leadership Essay**

### **Introduction**

The American law enforcement agencies are made up of local, state, and federal organizational levels. In this paper, there is an identification of the policing function of these agencies. Besides, there is a comparison and contrast of how the organizational, management, administration, and operational services are similar or different in these agencies. Lastly, the leadership characteristics and responsibilities of law enforcement officers are discussed.

### **Local Police Policing Function**

The local police have many roles that they play, which have been broken down to different duties, functions, and responsibilities. The local police have a responsibility of providing routine patrol in the areas that they have been assigned in a given community. They are also involved in the provision of emergency services and ensuring that traffic laws are adhered to by all public road users. They have a role in investigating, planning, and analyzing crimes that have been committed in their area of jurisdiction (Peak, 2010). Besides, they are involved in crime prevention, ensuring healthy community relations, and also quelling riots. Another function of the local law enforcement authorities is the detention of adult and juvenile criminals before taking them to court.

### **State Law Enforcement Policing Function**

The state law enforcement authority is composed of the state police and the highway patrol units. The roles and functions of this police department are similar to that of the local police only that they have a more significant jurisdiction. The department is categorized into many units, which include investigative unit, aviation branch, and tactical division. The highway patrol units have the responsibility of ensuring safety in the state's highways. Besides, the group can also be involved in investigative functions where they assist the local police in investigating complex criminal activities within the state. The specialized divisions are engaged in different tasks; for instance, the tactical division plays essential roles in maintaining peace and enforcing state laws and regulations. The state police are also responsible for detaining criminals, protecting crime scenes, and offering emergency services to the public in case of accidents like fires or natural disasters (Whisenand, 2009).

### **Federal Police Function**

The federal agency law enforcement officers are divided into two categories. There are uniformed officers and investigative officers. However, some of the officers from the two divisions perform similar functions as per the requirements. The uniformed federal police provide their services in specific locations such as the capital of the United States, the White House, the Supreme Court, and

*Policing: Toward an Unknown Future* John Crank, Colleen Kadleck, 2013-12-16 The enclosed papers are the culmination of a project Dr John Crank and Dr Colleen Kadleck carried out assessing issues facing the police into the early 21st century The papers are future oriented in the sense that they anticipate trends visible today Everywhere the contributing scholars found that the organizational concept practice and function of the police were undergoing transition Yet the seeming state level hardening

of the police function was ubiquitous Two themes were noteworthy On the one hand in developing or second world countries police face endemic problems of corruption organized crime and drugs Police in response are undergoing centralization and intensification of law enforcement activities In countries with first world economies Canada the United States and Australia contributors discovered trends toward expansion of the police function a trend described by Brodeur as toward high policing It reflects the growing reliance on surveillance for crime control and for the tracking of minority indigenous and immigrant populations in crime prevention efforts The results suggest that governments sometimes encouraged by their citizenry seem increasingly to rely on the police to deal with a broad array of social as well as criminal problems This book was originally published as a special issue of Police Practice and Research

in the n 2 molecule the nitrogen atoms have an  $\sigma$  bond and two  $\pi$  bonds holding the two atoms together the presence of three strong bonds makes n 2 a very stable molecule phosphorus is a third period element and as such does not form  $\pi$  bonds

efficiently therefore it must fulfill its bonding requirement by forming three  $\sigma$  bonds
