Canada is experiencing an unparalleled crisis involving forests and communities across the country While municipalities policy makers and industry leaders acknowledge common challenges such as an overdependence on US markets rising energy costs and lack of diversification no common set of solutions has been developed and implemented Ongoing and at times contentious public debate has revealed an appetite and need for a fundamental rethinking of the relationships that link our communities governments industrial partners and forests towards a more sustainable future The creation of community forests is one path that promises to build resilience in forest communities and ecosystems This model provides local control over common forest lands in order to activate resource development opportunities benefits and social responsibilities Implementing community forestry in practice has proven to be a complex task however there are no road maps or well developed and widely tested models for community forestry in Canada But in settings where community forests have taken hold there is a rich and growing body of experience to draw on The contributors to Growing Community Forests include leading researchers practitioners Indigenous representatives

government representatives local advocates and students who are actively engaged in sharing experiences resources and tools of significance to forest resource communities policy makers and industry *Our Social World* Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2016-11-30 Inspire your students to develop their sociological imaginations in *Our Social World* Focused on deep learning rather than memorization this book encourages readers to analyze evaluate and apply information about the social world to see the connection between the world and personal events from a new perspective and to confront sociological issues on a day to day basis Organized around the Social World Model a conceptual framework used across chapters to see the complex links between various micro to macro levels of the social system students will develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of discrete subjects

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation *Yojana*, 2014

Field, 2021-12-09 *Counting Religion in Britain 1970 2020* the fourth volume in the author's chronological history of British secularization sheds significant new light on the nature scale and timing of religious change in Britain during the past half century with particular reference to quantitative sources Adopting a key performance indicators approach twenty one facets of personal religious belonging behaving and believing are examined offering a much wider range of lenses through which the health of religion can be viewed and appraised than most contemporary scholarship Summative analysis of these indicators by means of a secularization dashboard leads to a reaffirmation of the validity of secularization in its descriptive sense as the dominant narrative and direction of travel since 1970 while acknowledging that it is an incomplete process and without endorsing all aspects of the paradigmatic expression of secularization as a by product of modernization

Bingo Capitalism Kate Bedford, 2019-09-26 Casinos are often used by political economists and popular commentators to think critically about capitalism Bingo an equal chance numbers game played in many parts of the world is

overlooked in these conversations about gambling and political economy Bingo Capitalism challenges that omission by asking what bingo in England and Wales can teach us about capitalism and the regulation of everyday gambling economies The book draws on official records of parliamentary debate case law regulations and in depth interviews with both bingo players and workers to offer the first socio legal account of this globally significant and immensely popular pastime It explores the legal and political history of bingo and how gender shapes and is shaped by diverse state rules on gambling It also sheds light on the regulation of workers players products places and technologies In so doing it adds a vital new dimension to accounts of UK gambling law and regulation Through Bingo Capitalism Bedford makes a key theoretical contribution to our understanding of the relationship between gambling and political economy showing the role of the state in supporting and then eclipsing environments where gambling played a key role as mutual aid In centring the regulatory entanglement between vernacular play forms self organised membership activity and corporate leisure experiences she offers a fresh vision of gambling law from the everyday perspective of bingo
