Ball Shah lived in Gujarat. He was a great miser. He hated to spend anything on anybody, even on himself. One day he saw some ripe dates on a tall palm tree. He liked dates very much and wanted to have some. But how could he get them? He did not like to ask anyone to climb up and get them for him, for he feared he might have to pay him something. So Ball Shah decided to climb the tree himself. He had never climbed up a date palm before, but he managed to reach the top. He was about to pick some dates when he happened to look down. The sight from the ground frightened him so much that he started to tremble. The climb had already tired him. His hold on the tree was getting weaker. He feared that he was about to fall down. He would certainly be killed. There was nobody to help him, so he cried to God for help. He proposed to do everything he could to please God. He took a solemn vow that he would feed a thousand brahmins if only God would bless him to climb down safely. Taking this vow gave him some courage.

Environmental Security and India Satabdi Das, 2022-08-26 This book examines environmental issues through the lens of security studies and presents a comprehensive analysis of Indian policy in dealing with threats posed by climate change. This book puts forward a theoretical base for securitization of environmental issues incorporating different schools of thought. Presents a survey of global environmental politics in general and the effects of climate change and its consequences for India's national security in particular. Examines the politics involved in India's environmental policy at both the domestic and international levels. Outlines key policy takeaways and possibilities for action that can help contain the threat of environmental change. A comprehensive guide to a new and emerging dimension in Indian security policy, this book will be essential reading for students and researchers of international relations, security studies, especially non-traditional security, public policy, especially environmental policy, and area studies.

International Organizations and the Implementation of the Responsibility to Protect Daniel Silander, Don Wallace, 2015-04-17 This book seeks to understand the obligation of the international community to implement the principles of the Responsibility to Protect (R2P). With a focus on the humanitarian crisis in Syria, the volume examines what formal responsibility and actual capability international institutions have to protect and prevent civilians from systematic mass atrocities and presents an analysis of several prominent international organizations (IOs). Each chapter focuses on a specific organization and explores their formal responsibilities and how these pertain to the obligations of the R2P. Existing capabilities and actual abilities to address the challenges of R2P are analysed by looking at these issues before, during, and after the occurrence of the humanitarian crisis in Syria. With the UN not fully engaged in the Syrian conflict, the systematic human rights abuses have engendered greater attention on other organizations. This volume argues that if the UN Security Council's inactions result in an abdication of responsibilities under the UN Charter, there should not only be a discussion of how the UN must alter its approach but also an examination of whether there are alternative R2P paths for other MNOs to take in the name of international peace and human security. This book will be of much interest to students of R2P, humanitarian intervention, international organisations, Middle Eastern politics, and security studies.

Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers' guides across 13 countries and 19 projects. Using quantitative and qualitative methods, we examine how teachers' guides across the projects differ and find substantial variation in the design and structure of the documents. We develop a scripting index so that the scripting levels of the guides can be compared across projects. The impact results of the programs that use teachers' guides

show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide
