Breaking Barriers Stanley S. Litow, Tina Kelley, 2021 *Breaking Barriers* shows how to redesign high schools so that all students can move on to college and successful careers In a negation of the American Dream a child's zip code is currently a far better predictor of success than hard work intelligence or resilience This book tells the story of a school model that focuses on equity and works to prove that all young people can achieve academic excellence given the right support P TECH Pathways in Technology Early College High School combines public high schools and community colleges in partnership with employers providing both opportunity and support for all students This innovative and effective approach eliminates barriers to replication by engaging all stakeholders The first P TECH which opened in a low income Brooklyn neighborhood is now a model for school reform Praised by President Obama and heads of nations its story is told through the voices of students who have shattered the myths about which students can succeed *Breaking Barriers* is a compelling read It shows that a clear pathway from school to college to career goes beyond an aspiration it's achievable and for all students The global success of P Tech schools is something education government and business leaders need to learn about and get behind Arne Duncan former United States Secretary of Education *Breaking Barriers* is a must read The P Tech story shows that quality schools leading to not just a high school diploma but college completion and career success are critical to our future This is the kind of opportunity and support that must be provided to all students regardless of income or race Darren Walker president Ford Foundation

Disability Rights and Religious Liberty in Education Bruce J. Dierenfield, David A. Gerber, 2020-07-06 In 1988 Sandi and Larry Zobrest sued a suburban Tucson Arizona school district that had denied their hearing impaired son a taxpayer funded interpreter in his Roman Catholic high school The Catalina Foothills School District argued that providing a public resource for a private religious school created an unlawful crossover between church and state The Zobrests however claimed that the district had infringed on both their First Amendment right to freedom of religion and the Individuals with Disabilities Education Act IDEA Bruce J Dierenfield and David A Gerber use the Zobrests story to examine the complex history and jurisprudence of disability accommodation and educational mainstreaming They look at the family's effort to acquire educational resources for their son starting in early childhood and the choices the Zobrests made to prepare him for life in the hearing world rather than the deaf community Dierenfield and Gerber also analyze the thorny church state issues and legal controversies that informed the case its journey to the U S Supreme Court and the impact of the high court's ruling on the course of disability accommodation and religious liberty

Office of Management and Budget, 2014 **School Effectiveness and Improvement Research, Policy and Practice** Christopher Chapman, Paul Armstrong, Alma Harris, Daniel Muijs, David Reynolds, Pam Sammons, 2012-03-12 This book provides a contemporary overview of school effectiveness and improvement It charts the development theory and research in this area and looks at the contribution made to policy and practice It also challenges some assumptions that have become ingrained into the theoretical and methodological traditions of the field By challenging these orthodoxies it provides a framework that sets a new agenda and repositions the field to meet the emerging challenges of the twenty first century It argues that traditional measures of

school effectiveness are challenged as systems have attempted to adapt to a complex range of emerging agendas New theoretical perspectives are required which consider education and a broader set of outcomes This shift requires a rethink of how effectiveness and improvement have been understood by the field and a reconstruction by policy makers and practitioners Attention must be given to promoting equity as well as effectiveness so that one school or student's gain no longer means another's loss The field must develop new methodologies if inequities are to be challenged and a broader set of outcome measures are to be developed The two questions guiding this book are How can educational effectiveness and improvement research and practice support the development of a more equitable education service What are the key indicators of educational effectiveness and improvement and what are the new methodologies required to facilitate a shift from school effectiveness and improvement to educational effectiveness and improvement This book uses lenses of research policy and practice to explore these key questions and articulate what such a repositioning may look like and how it may be achieved It will prove invaluable for teachers school leaders and anyone involved in policy and educational research
