The Scars of Project 459 Traci Angel,2014-03-01 The Scars of Project 459 tells the environmental story of the Lake of the Ozarks built by the Union Electric Company in 1931 At 55 000 acres the lake was the biggest manmade lake in the United States at the time of its completion and it remains the biggest in the Midwest with 1 100 miles of shoreline in four different Missouri counties Though created to generate hydroelectric power not for development the Magic Dragon as it is popularly known because of its serpentine shape has become a major recreational area Located in some of the most spectacular Ozark scenery the giant lake today attracts three million visitors annually and has more than 70 000 homes along its shoreline Traci Angel shows how the popularity of the Lake of the Ozarks has resulted in major present day problems including poor water quality loss of habitat and increasing concerns about aging waste management systems for the homes surrounding the lake Many in the area especially business owners whose incomes depend on tourism resist acknowledging these problems The Scars of Project 459 aims to make public the challenges facing this important resource and ensure that its future is not to be loved to death

The Meat Crisis Joyce D'Silva,John Webster,2017-08-23 Meat and dairy production and consumption are in crisis Globally 70 billion farm animals are used for food production every year It is well accepted that livestock production is a major contributor to greenhouse gas emissions The Food and Agriculture Organization of the United Nations FAO predicts a rough doubling of meat and milk consumption in the first half of the 21st century with particularly rapid growth occurring

in the developing economies of Asia What will this mean for the health and wellbeing of those animals of the people who consume ever larger quantities of animal products and for the health of the planet itself The new edition of this powerful and challenging book explores the impacts of the global growth in the production and consumption of meat and dairy including cultural and health factors and the implications of the likely intensification of farming for both small scale producers and for animals Several chapters explore the related environmental issues from resource use of water cereals and soya to the impact of livestock production on global warming and issues concerning biodiversity land use and the impacts of different farming systems on the environment A final group of chapters addresses ethical and policy implications for the future of food and livestock production and consumption Since the first edition published in 2010 all chapters have been updated three original chapters re written and six new chapters added with additional coverage of dietary effects of milk and meat antibiotics in animal production and the economic political and ethical dimensions of meat consumption The overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world

Nicholas R. Bell, 2013-10-01 A Measure of the Earth provides an unparalleled window into an overlooked corner of recent American history the traditional basketry revival of the past fifty years Steve Cole and Martha Ware amassed a remarkable collection using the most stringent guidelines baskets made from undyed domestic materials that have been harvested by the maker An essay by Nicholas Bell details the long standing use of traditional fibers such as black ash and white oak willow and sweetgrass and the perseverance of a select few to claim these elements the land itself for the enrichment of daily life As they trek through woods fields farm and shore in the quest for the right ingredients for a basket these men and women cultivate an enviable knowledge of the land Each basket crafted from this knowledge provides not only evidence of this connection to place but also a measure of the earth Drawing on conversations with the basketmakers from across the country and reproducing many of their documentary photographs Bell offers an intimate glimpse of their lifeways motivations and hopes Lavish illustrations of every basket convey the humble tactile beauty of these functional vessels **Japan's Official**
