Laboratory Manual Human Anatomy Physiology Wood:

Laboratory Manual for Anatomy Physiology Featuring Martini Art, Michael G. Wood, 2012-01-27 Known for its carefully guided lab activities, accurate art and photo program, and unique practice and review tools that encourage students to draw, label, apply clinical content, and think critically, Wood's Laboratory Manual for Anatomy Physiology with Martini Art featuring MasteringA P Pig Version Fifth Edition offers a comprehensive approach to the two semester A P laboratory course. The stunning full color illustrations are adapted from Martini and Nath's *Fundamentals of Anatomy Physiology* Ninth Edition, making this lab manual a perfect companion to that textbook for instructors who want lab manual art to match textbook art. The use of the Martini art also makes this lab manual a strong companion to Martini and Nath's *Visual Anatomy Physiology*. This manual can also be used with any other two semester A P textbook for those instructors who want students in the lab to see different art from what is in their textbook. This lab manual is available in three versions: Main, Cat, and Pig. The Cat and Pig versions are identical to the Main version but also include nine cat or nine pig dissection exercises at the back of the lab manual. The Fifth Edition features more visually effective art and abundant opportunities for student practice both in the manual and online. For the first time, this manual comes with MasteringA P The new Practice Anatomy Lab (PAL) 3.0 virtual anatomy program and the new PhysioEx 9.0 physiology lab simulation program, both housed within MasteringA P, to give students valuable coaching and practice.
