Concise Guide to Wine and Blind Tasting, second edition Neel Burton, 2016-06-08 This book is for all those seeking to acquire a deep and systematic appreciation and understanding of wine, whether for exams, work, or pleasure. It outlines a simple yet robust framework for analyzing wine as objectively as possible and provides all the background knowledge that you need to interpret your findings, covering everything from grape varieties and vineyard management to winemaking techniques and the world's most important wine styles. It seeks throughout to examine in what ways a particular wine is unique and different from other similar wines. For example, why and in what ways is Pauillac in Bordeaux different from Pomerol, also in Bordeaux? Why and in what ways is Mosel Riesling different from Riesling from the Rheingau or the Nahe or Alsace, Austria, or Australia? This book is dedicated to all wine lovers and should prove particularly useful to amateur and competitive blind tasters, students on higher level wine courses, sommeliers, and anyone else who buys, sells, or recommends wine.

Current Therapy in Medicine of Australian Mammals Larry Vogelnest, Timothy Portas, 2019-05-01 *Current Therapy in Medicine of Australian Mammals* provides an update on Australian mammal medicine.

Although much of the companion volume *Medicine of Australian Mammals* is still relevant and current there have been significant advances in Australian mammal medicine and surgery since its publication in 2008. The two texts together remain the most comprehensive source of information available in this field. This volume is divided into two sections. The first includes comprehensive chapters on general topics and topics relevant to multiple taxa. Several new topics are presented including wildlife health in Australia and the important role veterinarians play in Australia's biosecurity systems, medical aspects of native mammal reintroductions and translocations, disease risk analysis, wildlife rehabilitation practices in Australia with an emphasis on welfare of animals undergoing rehabilitation, management of overabundant populations, immunology and stress physiology. The second section provides updates on current knowledge relevant to specific taxa. Several appendices provide useful reference data and information on clinical reference ranges, recommended venipuncture sites, chemical restraint agent doses and regimens, a drug formulary and dental charts. Written by Australian experts, *Current Therapy in Medicine of Australian Mammals* is clinically oriented with emphasis on practical content with easy to use reference material. It is a must have for veterinarians, students, biologists, zoologists and wildlife carers and other wildlife professionals. This volume also complements updates and utilises the resources of other books such as *Radiology of Australian Mammals* Vogelnest and Allan 2015, *Pathology of Australian Native Wildlife* Ladds 2009, *Haematology of Australian Mammals* Clark 2004 and *Australian Mammals Biology and Captive Management* Jackson 2003, all CSIRO Publishing publications.
