## Life Orientation Exemplar 2014:

**The Partisan Next Door** Ethan C. Busby, Adam J. Howat, Jacob E. Rothschild, Richard M. Shafranek, 2021-09-29 In the United States politics has become tribal and personalized The influence of partisan divisions has extended beyond the political realm into everyday life affecting relationships and workplaces as well as the ballot box To help explain this trend we examine the stereotypes Americans have of ordinary Democrats and Republicans Using data from surveys experiments and Americans own words we explore the content of partisan stereotypes and find that they come in three main flavors parties as their own tribes coalitions of other tribes or vehicles for political issues These different stereotypes influence partisan conflict people who hold trait based stereotypes tend to display the highest levels of polarization while holding issue based stereotypes decreases polarization This finding suggests that reducing partisan conflict does not require downplaying partisan divisions but shifting the focus to political priorities rather than identity a turn to what we call responsible partisanship

Hanulíková, Bernd Kortmann, 2017-06-05 Recent years have seen an upsurge of interest in the notion of salience in linguistics and related disciplines While in top down salience perceivers endogenously direct their attention to a certain stimulus in the bottom up salience it is the stimulus itself which attracts attention In prototypical cases of bottom up salience the stimulus stands out because it is incongruous with a given ground by virtue of intrinsic physical characteristics But a stimulus may also cause surprise by virtue of deviating from a cognitive ground e g when violating social or probabilistic expectations This has prompted researchers to examine the relationship between expectations and the perceptual salience of linguistic stimuli in new ways This e book features contributions from different scientific frameworks The reader will find commentaries reviews and original research articles on models of sociolinguistic and morphological salience the role of attention affect and predictability and on how salient items are processed categorized and learned Taken together the articles in this volume contribute to our understanding of how the perceptual salience of linguistic forms and variants can be theoretically framed and methodologically operationalized in different areas of linguistic processing
