Dagmar Lorenz-Meyer, Pat Treusch, Xin Liu, 2020-06-29 This book develops the concept of feminist technoecologies as a theoretical and methodological tool for examining the co constitutive relation between technology and ecology which have typically been considered as distinct objects of studies In underscoring how their dynamic relationality troubles the location of agency this book challenges the idea that technology as the marker of the innovative capacity of the human either corrupts or saves ecology The contributions to the volume present feminist approaches that contextualise and historicize such issues as multi species survival border control regimes solar power bioart artificial intelligence and air pollution They insist on the centrality of corporeality affects ethics and vulnerability in the materialisation of technoecological relations and call into question the exceptional status of the figure of hu Man Together they offer critical and creative tools or modes of inquiry for imagining alternative modalities of practicing care and thinking environmental sustainability As a creative contribution to the growing literature on new configurations of bodies technologies and environments against the backdrop of ecological degradation digital technologization and precarity in late capitalism *Feminist Technoecologies* extends the interchanges between feminist materialisms environmental humanities and feminist technosciences studies and will be a resource for all those interested in these fields This book was originally published as a special issue of *Australian Feminist Studies* *The Genera of Lactic Acid Bacteria* W.H.N Holzapfel, B.J. Wood, 2012-12-06 The *Lactic Acid Bacteria* is planned as a series in a number of volumes and the interest shown in it appears to justify a cautious optimism that a series comprising at least five volumes will appear in the fullness of time This being so I feel that it is desirable to introduce the series by providing a little of the history of the events which culminated in the decision to produce such a series I also wish to indicate the boundaries of the group *The Lactic Acid Bacteria* as I have defined them for the present purposes and to outline my hopes for future topics in the series Historical background lowe my interest in the lactic acid bacteria LAB to the late Dr Cyril Rainbow who introduced me to their fascinating world when he offered me a place with him to work for a PhD on the carbohydrate metabolism of some lactic rods isolated from English beer breweries by himself and others notably Dr Dora Kulka He was particularly interested in their preference for maltose over glucose as a source of carbohydrate for growth expressed in most

cases as a more rapid growth on the disaccharide but one isolate would grow only on maltose Eventually we showed that maltose was being utilised by direct fermentation as the older texts called it specifically by the phosphorolysis which had first been demonstrated for maltose by Doudoroff and his associates in their work on maltose metabolism by a strain of *Neisseria meningitidis*
