Labor Economics Borjas 5th Edition Text:

Labor Economics George Borjas, 2010 *Labor Economics 5e* is a well received text that blends coverage of traditional topics with modern theory and developments into a superb Labor Economics book. The Fifth Edition builds on the features and concepts that made the first four editions successful, updating and adding new content to keep the text on the cusp of recent events in the Labor Economics field. The new edition continues to be the most concise book in the market, enabling the instructor to teach all relevant material in a semester long class. Despite the book's brevity, the instructor will find that all of the key topics in labor economics are efficiently covered in the Fifth Edition. Thanks to updated pedagogy, new end of chapter material, and even stronger instructor support, the Fifth Edition of *Labor Economics* remains one of the most relevant textbooks in the market.

Books in Print, 1991 *Challenges and Options: The Academic Profession in Europe* Maria de Lourdes Machado-Taylor, Virgílio Meira Soares, Ulrich Teichler, 2017-02-21 This volume explores the various issues that have an impact on the academic career of professionals in European higher education. Higher Education Institutions (HEIs) are currently subject to profound uncertainties and are more challenged than ever on quality issues both with regard to their conceptual nature and in the extension and amendment of their mission. Divided into three parts, the first part of the book deals with the challenges and issues in higher education academic careers. It addresses such topics as the influence of European policies and changes, the cultural differences in the preferences of academics for teaching or research, the increasing inequality in working conditions for academics, and the changing nature of academic strategy in the transformational world of higher education with its implications for academic structures, work, and careers. The second part of the book analyses the findings of a national study on satisfaction of academics in Portuguese higher education, carried out at the Centre for Research on Higher Education Policies (CIPES). The third part offers a comparative analysis of a number of national European case studies focusing on the changing relevance of, and increasing expectations around, academic careers. The concluding chapter discusses whether the academic profession is merely an artificial term that has to do with a heterogeneous range of occupations or if there are important common elements of the academic profession across European Higher Education systems.

Labor Economics George J. Borjas, 2002 George Borjas' well received text blends coverage of traditional topics with modern theory and developments into a superb Labor Economics book. His integration of theory with facts and coverage of latest research make his book one of the most popular at the middle and upper end of the market.
