a particular book or resource In response to this problem more librarians have been added employed and this has escalated the cost of managing the library This inefficiency led to the study that was aimed at automating the book keeping function of the library A study was carried out at Kampala International University Dar salaam Campus and it was discovered that the manual system had inefficiencies ranging from time wastage high cost of operation in terms of human resources long search time data redundancy among others A computer based library management system was developed using visual studio The new system allows the user to add books into the system search for books from the system database track member information manage borrowing among others By automating library operations the university will enjoy the advantages of using databases and transaction processing systems
